

Modia muzo

Why fix your presentation tools to walls?

Modia is a portable media unit. Perfect for meeting, training, learning and lounge environments. There's no need for fixed presentation rooms with Modia. Simply unlock the Jewel casters, roll into place and you're all set. There are up to six power sockets within the rear cable management housing and a table-top to place laptops, devices and remotes.

Never waste a second waiting for rooms to become available, simply find a comfortable spot in your environment and roll Modia into place. The Jewel caster ensures total stability when locked, and the levelling feature keeps things nice and stable.

Performance points

Power

Six power sockets allow you to plug in and perform without any worry of batteries running flat.

Support

Modia supports flat screen TV's with maximum screen size of 65 inch and weight of 40 kg.

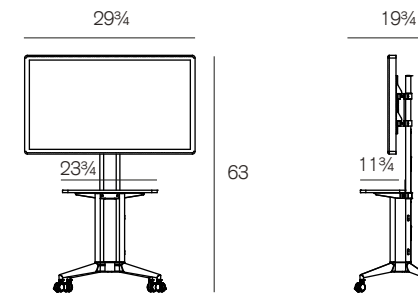

Table top

Perfect to rest laptops, devices, remote controls and anything you see fit.

Jewel casters

The caster ensures Modia is as stable as a fixed media unit when the breaks are engaged. The dual-locking mechanism prevents the wheels rolling and twisting.
