Scribble zones

Scribbling is a door opened to the unconscious. A creative gesture where we give freedom to our imagination; we scribble to stop worrying or facilitate the wait, but also to escape and be inspired. We often hide or tear out our scribbles out of fear of appearing bored, but rather than betraying a lack of concentration they indicate that we are focussing or deepening our ideas.

Education has and continues to fail us by associating scribbling, doodling and general restlessness as unproductive and insubordinate.

However every student is different and some don't have the capacity to sit perfectly still and expand their learning process simply by listening. Some students don't have the social confidence to stand at the front of class and express themselves on a whiteboard for everyone to judge.

At Muzo we understand that in order to foster creativity and growth we must offer more solutions for students to absorb information in their own way and allow individual personalities to shine.

We continue to create tools that transform the learning space into a creative ally that supports students in their growth through school.

Scribble zone products

Muzo Paint

Available in White, Clear and Magnetic.

Stashbox

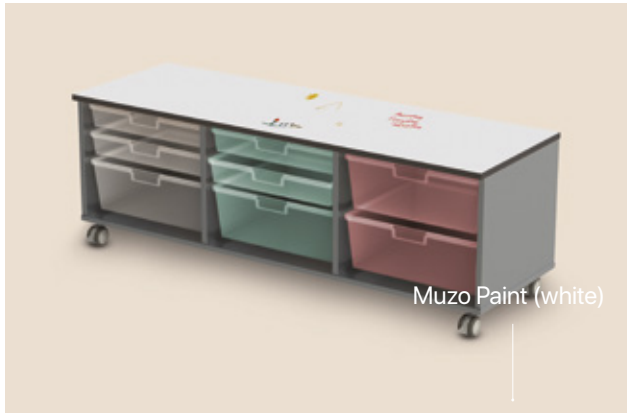

A light, easy access carry case for stationery and cleaning products.

Dry-erase laminate writable tables

Write on your table surface horizontally and vertically.

Stash storage

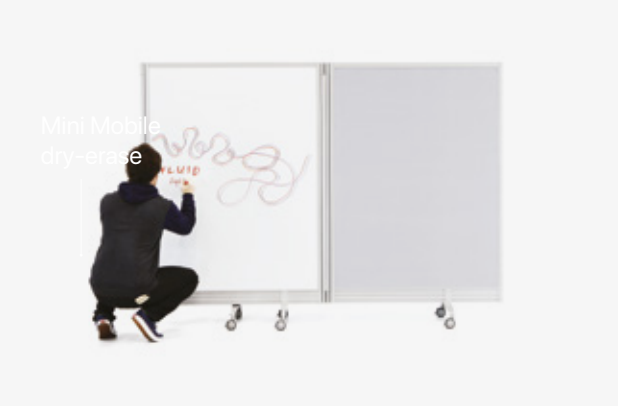

Mobile storage with dry-erase surfaces.

Muzo Spray

A uniquely developed spray that provides a safe, deep clean.

Flow

Mobile, magnetic and writable ideas wall.

Integrating Muzo scribble zones into your space

Muzo Paint — Preparation

1. Use the tape to frame your Muzo Paint area.
2. Use the protective cover to avoid dust and paint spills.
3. Smooth the surface with the sanding block.
4. Use the gloves and, if possible, eye protection.

Muzo Paint — Application

Muzo Paint White/Clear

Apply the paint no later than 2 hours after mixing the 2 components

1. Open the tins with the tin opener carefully.
2. Use the stir to mix the two components for 5 min.
3. Pour half of the mixture into the tray.
4. Close the rest of the paint in the tin.
5. Apply the first layer evenly with paint roller/brush.
6. Wait min. 30 min. and max. 45 min.
7. Apply the second layer and proceed to ‘Finish’ section.

Muzo Paint Magnetic

one extra day for the application process

1. Stir well.
2. Use the extra paint tray/roller to apply the first layer.
3. Wait 30 min.
4. Apply the second layer.
5. Wait 45 min.
6. Apply the third layer.
7. Wait 60 min.
8. Apply the fourth layer.
9. Remove the tape.
10. Wait for 12 hours.
11. Smooth the surface with the sanding block.
12. Proceed to ‘Primer’ section.

Muzo Paint Primer

*To change the color of the surface or to prime a Muzo Paint Magnetic surface

1. Use the extra tray and a paint roller sleeve to apply the first layer.
2. Wait between 30 and 60 min.
3. Apply the second layer.
4. Wait between 30 and 60 min.
5. Proceed to ‘Muzo Paint White/Clear’ section.

Finish

Note! Start writing 3 days after the paint is dry

1. Make sure the paint is distributed evenly.
2. Remove the painting tape.
3. Place the ‘Wet Paint’ sign.
4. Let it dry for three days before using the wall.
5. Check the other side for maintenance guidelines.
6. Put the ‘Write on me’ sticker on the dry Muzo Paint wall.

Maintenance of Muzo dry erase surfaces

Muzo Paint surfaces

- Use writing and erasing accessories from Muzo
- Erase with soft foam sponge
- Clean using micro fibre cloth in combination with Muzo Spray for a deeper clean

- Do not use permanent and flip chart markers (in such case please contact us)
- Do not use the Muzo Spray for the first 2 weeks after painting
- Do not write immediately after spraying
- Do not use the spray with the soft sponge for cleaning (use only with microfibre cloth)
- Do not erase with hard or abrasive materials
- Do not clean the markers with degreasers, nail polishers, diluents or other aggressive cleaning chemicals

Muzo dry erase laminate writable surfaces

- Use only dry erase markers that are designed for use on erasable markerboard surfaces.
- Dry erase writing can be removed with a white board eraser or a clean dry micro fibre cloth.
- We advise that you should clean off your tables at the end of each day with your eraser and avoid residue build up.
- Where necessary use a markerboard cleaner spray designed for dry erase surfaces.
- Always use a dry micro fibre cloth with Muzo spray.

- Do not polish or wax the surface.
- Use of abrasive cleaners, powders, scouring pads, steel wool, sandpaper etc., will damage the finish and permanently reduce the performance of the decorative dry erase surface.
- Acid or alkaline-based cleaners, compounds, etc., will mark, etch, corrode and permanently discolor the decorative surface. Never use these materials on dry erase surfaces, nor allow containers, rags etc., contaminated with them to come in contact with the surface.
- Accidental spills or splatters should be wiped off immediately and the area cleaned with a damp cloth.
- Never use detergents such as washing-up liquids to clean the surface because they usually contain fatty substances for the skin. A greasy film can remain on the surface making it extremely difficult to clean the surface and remove ghosting.

Muzo Paint FAQ

What are the available colors?

Subject to quantity. Muzo Paint (Custom) can be any color from the RAL range. Just pick a number according to your preferences. Note: Muzo Clear Paint can turn an existing colored wall into a dry erase surface.

Do I need special accessories for writing, erasing and maintenance?

Not necessarily. Good quality whiteboard accessories can work. However, for optimal performance we recommend our markers and cleaning products as they are perfectly suited for all the Muzo scribble zones and used correctly will prevent ghosting and smudging. Please ask for the Muzo care and maintenance manual.

Is Muzo Paint safe?

Absolutely. Created in accordance with the very latest research/development in paint production, Muzo Paint is a completely harmless and eco-friendly product. It's water-based, low VOC formula makes it a smart choice for schools, colleges, universities and workspaces.

Can I use a projector on Muzo Paint?

Yes. While Muzo Paint has the standard reflection of a whiteboard, the satin finish provides up to 70% reduction of reflected light allowing you to project sharp images on the painted surface.

How long does Muzo Paint last?

Muzo Paint comes with a 10 year limited warranty. The warranty is subject to correct care and maintenance.

How do I remove Muzo Paint?

In order to do that you should apply primer and then latex paint. Depending on the color you can apply 1-2 layers of primer. Please contact us for further information.

What is the coverage?

One 64 oz tin provides 160ft² of wall coverage
