

**muzo** K12

Muzo encourage real growth in all areas of schools, universities and communities. Our amazingly agile products can help others totally transform not only their space, but ways of thinking about space.

Flexible classrooms make way for new growth and ideas, enabling young learners to express their inner emotions and elaborate on academic ideas. Our classrooms are designed to catalyze students and teachers through the different learning and teaching modes made available through our products.

## Mini Mobile

A fun folding and nesting table system. As good as fixed-frame tables when the Jewel caster breaks are engaged, as fluid as water when in motion. Mini Mobile is a highly functional table system that can fit into any project, no matter what the size.

Quickly create table formations with Mini Mobile. If you need some space, you can wheel the tables away, fold them down and nest them neatly together.

Kite®

More than a table system, Kite is a dynamic, fluid business tool. You can add tables to expand when needed, rearrange them in seconds whenever called for, efficiently store/nest them when required and even level tables on uneven floors.

When considering the elaborate interplay of mind and body, we discovered that movement is essential to learning via an awakening and activation of mental capacities. Kite is designed to adjust and move to fit into every situation, and once that situation is found, you will find the layouts naturally form socially ergonomic spaces.

## Versatilis

Any size, shape and height table (ranging from 14 to 41 inch high). Versatilis is the mobile table for every situation that gives you the hassle-free ability to create a diverse range of customized tables with one product line.

Unrivalled shape options, continuity of components and aesthetic ensures your space is fluid, creative and unified. You can even match up Versatilis as a non-folding partner to Kite, further increasing optionality.

## Dry erase tables

Muzo table shapes, colors and dry wipe surfaces are the perfect combination for encouraging social interaction, team working and a creative, no fear learning culture.

## Balance

The Muzo mobile product line provides you with tools that can adapt to an infinity of scenarios. You can shape your space Symmetrically, and this supports the need for order and concentration. Asymmetrical layouts support creativity and spontaneity. Radial layouts are great for sharing stories and campfire style gatherings.

01 ————— Symmetrical

02 ————— Asymmetrical

03 ————— Radial

## Harmony

Thinking in terms of condensation and rarefaction is useful when trying to create harmony within your space. Thanks to the Jewel caster, it is extremely easy to create condensed spaces and then quickly shift to rarefied spaces. We use a sound wavelength to further illustrate below.

01 ————— Condensed

02 ————— Rarefied

## Stash

21st century learning environments call for new and creative ways in thinking and new solutions. From K12 to higher education, the needs of faculty and students alike are unique in that they evolve as our understanding of the world evolves. Stash is a multi-faceted storage system from Muzo.

## Jewel caster—lifetime warranty

Our design philosophy is that the caster should never be an afterthought. In fact the caster should have careful attention given as its performance will dictate the success or failure of any mobile furniture design. After developing the caster for over a decade, our vote of confidence is to offer a lifetime warranty on it.

### Dual locking feature

Enables mobile products to behave like fixed products as no axis rotation is possible when the brake is engaged.

- 1 . The axis locks preventing twisting
- 2. The wheel locks preventing rolling

### Works on all floor surfaces

Rubber wheels transition easily from carpet to hard wood to tiled floors and easily tackles the realities of carpet trims and bumpy ground.

### 2 inch levelling

2 inch of levelling for uneven floors and stable on all floor surfaces thanks to the rubberized wheels.

### Prevents damage to footwear

To prevent damage to the top of your footwear, you can lock and unlock from the top of the pad by simply applying pressure.

## Social ergonomics

We all know how hard it can be to achieve well being across the board when it is such a subjective thing. This is why we bake optionality into our products, to offer users the choice to adjust accordingly at any moment to satisfy their physical and psychological needs. The very knowledge of the possibility to do this in itself increases well being, and allows an effective social ergonomics to be discovered and built from the bottom-up.
