

## Cleaning & Maintenance

### K-SEAT

K-seat is a fully plastic chair as such there are no parts to be maintained. If the chair is dirty or marked use a damp cloth to wipe clean, if this doesn't work use a mild detergent and wipe clean.

K-seat can be stacked away safely up to a height of 21 Chairs.

K-seat can be fully recycled.

### MBOB FLOOR

MBob floor chair comprises of a plastic shell attached to a Plastic Stability Base unit. The Floor chair can be cleaned using a damp cloth and a mild detergent.

MBob can be nested up to 3 high on the ground.

### MBOB CLASSIC

MBob Classic is a traditional 2-piece chair comprising of a plastic shell and metal frame with a powder coated finish connecting using 6 Rivets to provide a tight fixture.

The shell & frame can be cleaned with a damp cloth and a mild detergent.

Abrasive cleaners or scourers should not be used to clean the metal frame.

Chips and scratches on powder coated surfaces may be repaired or at least improved using touch up paint available from Muzo.
