The background is a vibrant blue with several large, organic, wavy shapes in varying shades of blue and cyan. In the upper right quadrant, there are several water droplets of different sizes, some with highlights, giving them a 3D appearance.

A Healthy Return to School

A Real Estate challenge? Muzo's entire history is built on the foundations of re-purposing real estate to adapt to the needs of the moment. It's in our DNA!

The 2020 pandemic has triggered learning space challenges for educators. Muzo are here to help! We have always focused our work on people, performance and place. Our experience and laser focus is in manufacturing adaptable, innovative, flexible and experiential solutions. Our ideas will lead the way in the safe and successful return to schools and every Muzo product comes with longterm investment protection. We guarantee Muzo furniture adds value, works for all and will last for generations – far beyond one cohort of pupils.

Topics to consider

1 Reconfigurability

Making quick changes to the layout of the room enables adaptability and full utilisation of a given space. Rearranging and reorientation of furniture will play a big part in the success of the space and its ability to support meaningful learning. As potential needs change, the ability to easily reconfigure is critical.

2 Mobility

Fully mobile furniture is imperative for rapidly shrinking and expanding classrooms. Furniture should be able to adapt to changing densities, and transport easily between classrooms.

3 Retrofitting

Where physical distancing is a challenge, retrofitting classrooms involves using screens, acoustic panels, sneeze guards, partitions or other barriers to create division. Schools can reposition, store or remove these as safety concerns change.

4 Indoor/Outdoor

Having furniture that works both indoors and outdoors facilitates a holistic approach to teaching and learning. We strongly believe in a proactive attitude towards flexible learning for the health and wellbeing of both teachers and pupils.

Gymnasium Hall

Case study

Quick and easy adaptability in the classroom provides insurance against uncertainty, helping teachers and learners to mold to different environments.

Here we have divided the space using Muzo Flow Screens, and have organized the Mini Mobile tables at the necessary distance alongside our K-seats.

We have also added a Stashbox to each desk, enabling extra stationery storage.

The furniture neatly nests (see circular image) and is ready to be either transported to another location or stored away for future use.

2 K-seat

3 Stashbox

4 Flow

5 Switch

Study rooms

Case study

Kite folding and nesting tables are used to provide each individual with a distanced table to work on. When needed, the tables configure to create a range of table layouts that allows users to collaborate at their discretion in a safe and healthy manner. (see circular image)

1 Kite

Indoor/Outdoor

Case study

This fun suite of products can work in both indoor and outdoor settings. We combined Xbrick and MBob to create a space that encourages different methods of teaching and learning. These super lightweight units can be lifted for easy distancing as and when required. Flow acts as a mobile whiteboard for visual teaching.

2 MBob

3 Flow

4 Stashbox

Outdoors

Case study

Give a group of students some Xbricks and a designated space to work outside – then watch the magic unfold. The light weight makes Xbrick easy to transport, while it can also be easily cleaned for the next use. In this example, it functions not only as a seat, but a table and a support for the dry erase board.

1 Xbrick

Outdoor lunch

Case study

Block is a robust table and bench that can be used indoors and outdoors. The generous size makes it easy to sit at the required distances, and the high-quality materials make it a great long-term investment for any indoor or outdoor dining area.

1 Block

Products

Xbrick

A multifunctional module that works indoors and outdoors. Combine them to create a range of seating and surface configurations.

MBob

Sitting on the floor has never been so comfortable. Available in a wide range of colors, the MBob is stackable with an easy-to-transport grab handle.

Mini Mobile

A mobile, folding and nesting table that configures to create a wide range of table layouts.

Flow

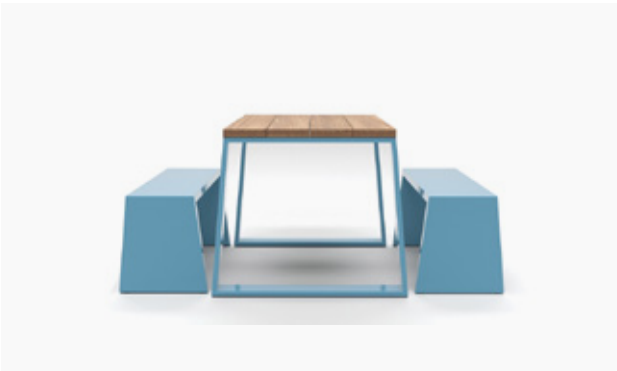

A mobile ideas wall that has dry erase on one side and acoustic fabric on the other. The dual locking caster keeps Flow firmly in place when locked.

Kite

A mobile, folding and nesting table that configures to create a wide range of table layouts.

Block

A table and bench that works both indoors and outdoors. The frame is available in a beautiful range of colors and the solid wood surfaces add a touch of class.

K-seat

A fully stackable, light and colorful chair available in three seat heights. Transit trolleys are available.

Stashbox

Keep stationery, schoolbooks and sanitary products all in one place with Stashbox. Available in five colors.

Your helping hand for the challenges ahead.

We are entering a conclusive period of change for both teaching and learning, where only innovation will do. With our flexible, adaptable solutions, we can prepare for these changes in the safest way possible.

Our classroom solutions provide that added insurance against the worst-case scenarios for learning environments. Every furniture piece is totally changeable, thereby increasing its strength and longevity.

Respond to rapid and unpredictable changes with a product you can trust. With our forward-thinking solutions, we've made the best of these serendipitous times – protecting you now and long into the future.
