

Bodyflex **muzo**

Elegantly fusing advanced
technology with excellent form

A winner of the international Red Dot Design award, Bodyflex utilizes advanced technology to actively support you. A simple chair which understands and intuitively responds to the needs of the user.

The Active Back Technology provides robust support for the natural ways the body moves when seated. The flexible nature of the seat enables users to perform optimally when task working or interacting with colleagues.

Possible colorways

Performance points

Backrest
The flexible Active Back offers 19 degrees of recline, instead of a stiff and immobile frame for the backrest support.

Seat pad
Bodyflex uses breathable fabrics, providing an extremely comfortable seat that has substantial resistance to abrasion.

Armrest
Durable, scratch resistant and most importantly comfortable even after long periods of use.

Recline lock
The multi-reclining feature provides upright sitting as well as variable degree recline.

Self Inclined Mechanism
The SIM moves smoothly in line with the human body. It provides recline support respectively to user's body weight which, orientates users to their workspace, and proactively assists users to standing position when leaving the seat.
