

MBob
muzo

An award winning innovative floor chair. MBob offers comfort for children and adults during floor activities.

The perfect compliment to our floor height table range. MBob is a multipurpose chair that provides a better and more comfortable sitting position. Raising the seat off the ground prevents fingers getting caught when moving in the chair.

Transform a plain, dull classroom into a bright and exciting place, capable of holding children's attention. The use of vibrant colors along with the ability to learn, create and collaborate at floor level encourages student engagement and fulfilment.

Combine with super low Versatilis tables to create dynamic, living classrooms which encourages learning and development in children and teachers.
