

Powerball **muzo**

A fun way to provide visible power outlets

Powerball features a mix of standard power outlets and TUF twin USB fast-charging outlets so that laptops, cell phones and tablets can all be charged with one unit.

Three different sizes (short, medium, tall) means Powerball can provide various surface heights with a visible, shareable power outlet.

There is no need to fumble under tables or linger close to walls looking for power outlets. Powerball bring localised power from floor boxes or walls to a convenient working height.

Performance points

USB sockets
Twin USB fast-charging outlets so that cell phones, tablets and wearables can all be charged with one unit.

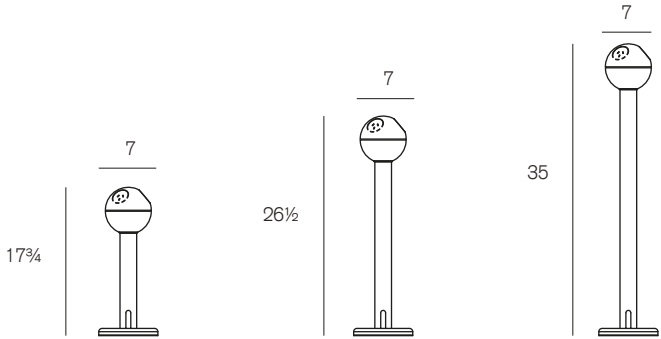

Power sockets
Standard power outlets especially helpful with laptop charging.

LED
Lighting strip available for extra visibility in darker environments.

Three heights
11½", 19½" and 29½"

Stability
Weighted base keeps Powerball fixed upright.

Dimensions

Materials

Base, stem and top hemisphere	 White
bottom hemisphere	 Brushed aluminum

Technical

Sockets
The top has 3 inlet/outlet sockets. Each socket can be specified with either a Nema (USA) electrical power socket or a TUF (Twin Usb Fast charge). The Nema socket is rated at 15A in line with UL962A. The rating is the same whether 2 or 3 sockets are specified. The TUF charger is currently rated at 2.3A max combined across the 2 USB ports.

Power cable
The single power cable is available at 58" or 88" long.

For special lead lengths, please inquire with our sales office.
