

Waltzer® muzo

You gotta roll with it,
and take your time.

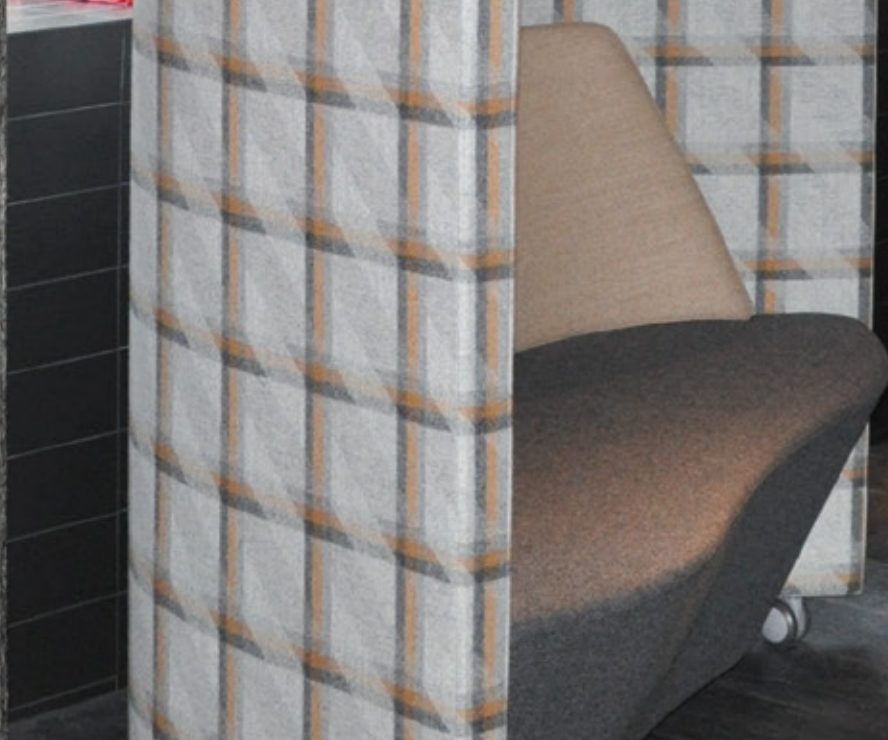

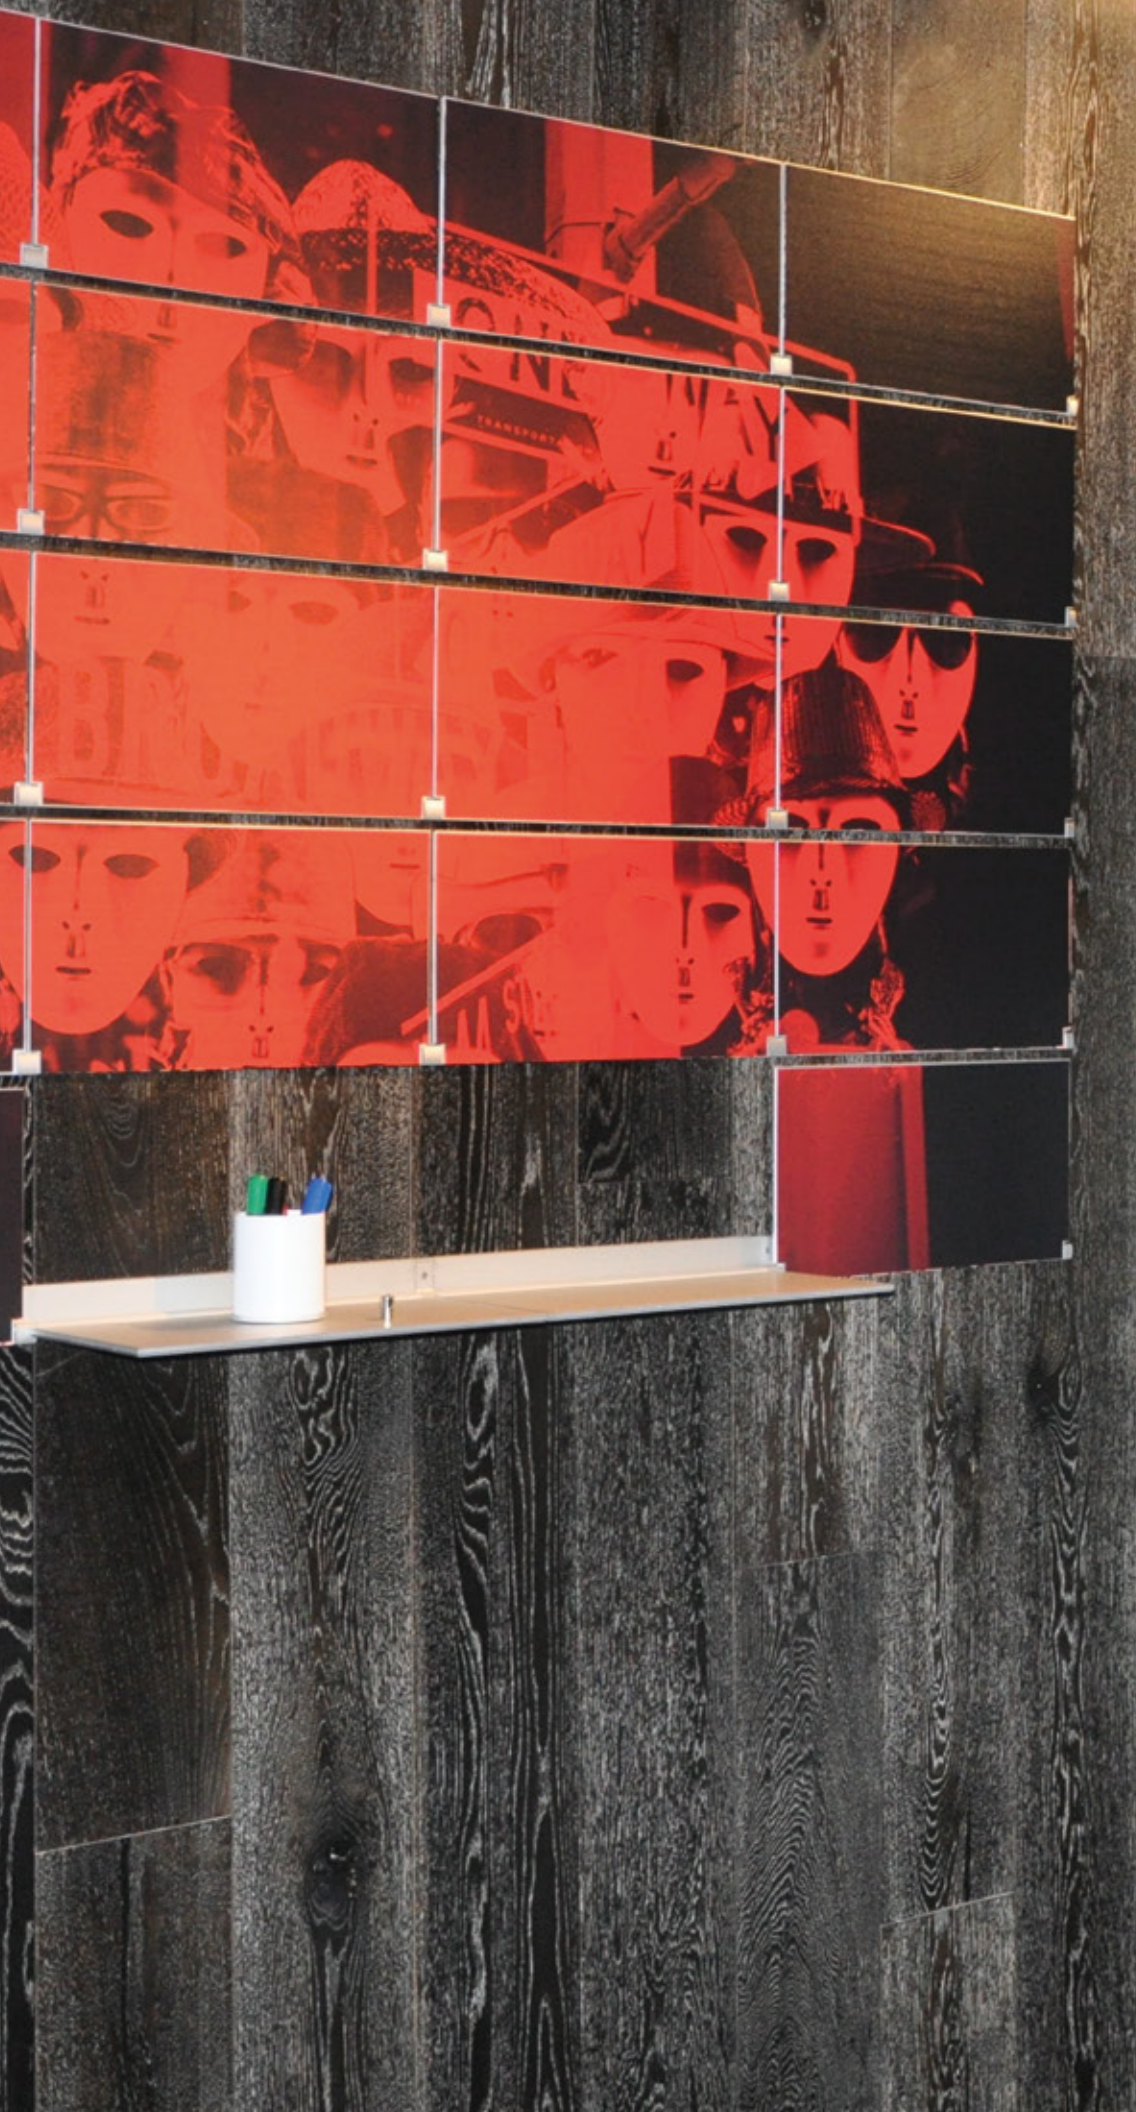

Waltzer is a simple roll around high or low back sofa that provides new and unique working opportunities within an open plan landscape. Whether you need to focus on tasks alone, collaborate with colleagues or take a study break, Waltzer has you covered.

Simply roll to your location, lock down the casters and you are ready to work. Waltzer can be effortlessly and smoothly configured into many different working styles thanks to the super strong and durable Jewel caster.

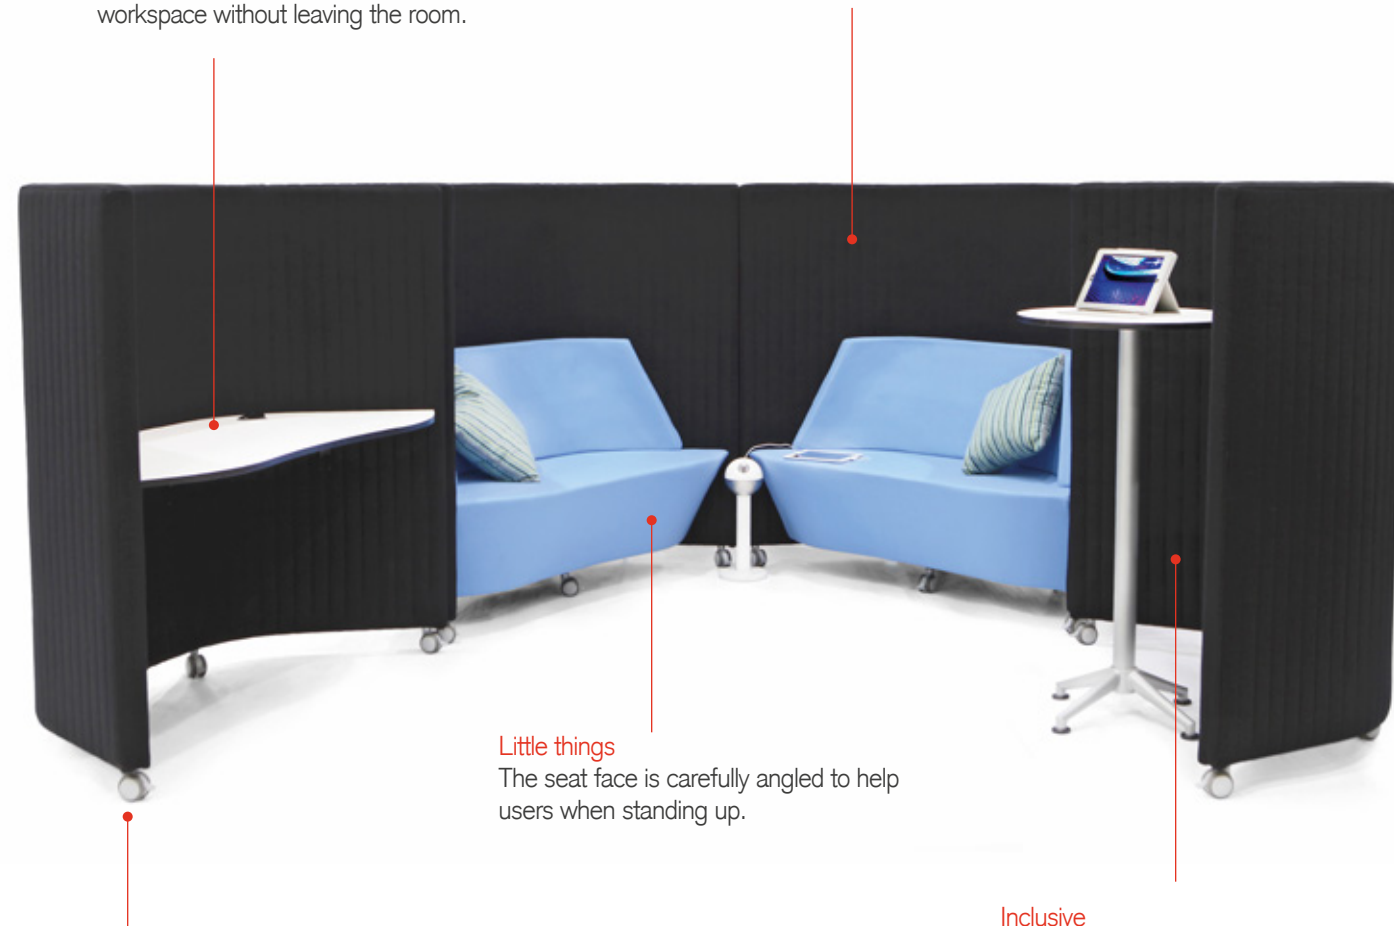

Performance points

Workstation

Perfect for focused work and when combined with Waltzer seat, users can easily create a individual semi-private workspace without leaving the room.

Acoustics

The layered foam helps reduce ambient noise when sat in Waltzer. Combining the workstation with the high back seat provides an excellent acoustic experience.

Little things

The seat face is carefully angled to help users when standing up.

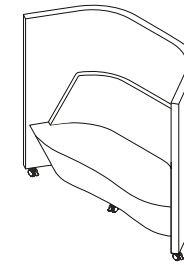

Jewel caster

The caster ensures Waltzer can perform like fixed-frame furniture when the breaks are engaged. The dual-locking mechanism prevents the wheels rolling and twisting.

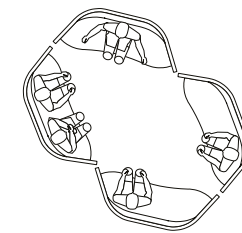

Inclusive

The Waltzer screen helps people using a wheelchair easily include themselves in a Waltzer meeting. It can also be used to provide modesty when combined with standing tables.

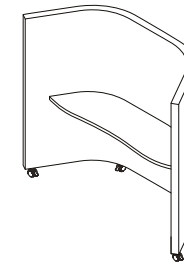

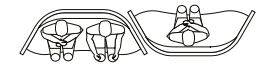

Possible uses

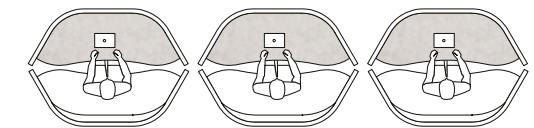

High back sofa

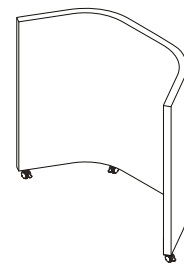

Collaborative lounge areas

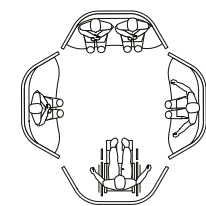

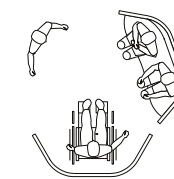

Workstation

Working units
