

Purpose

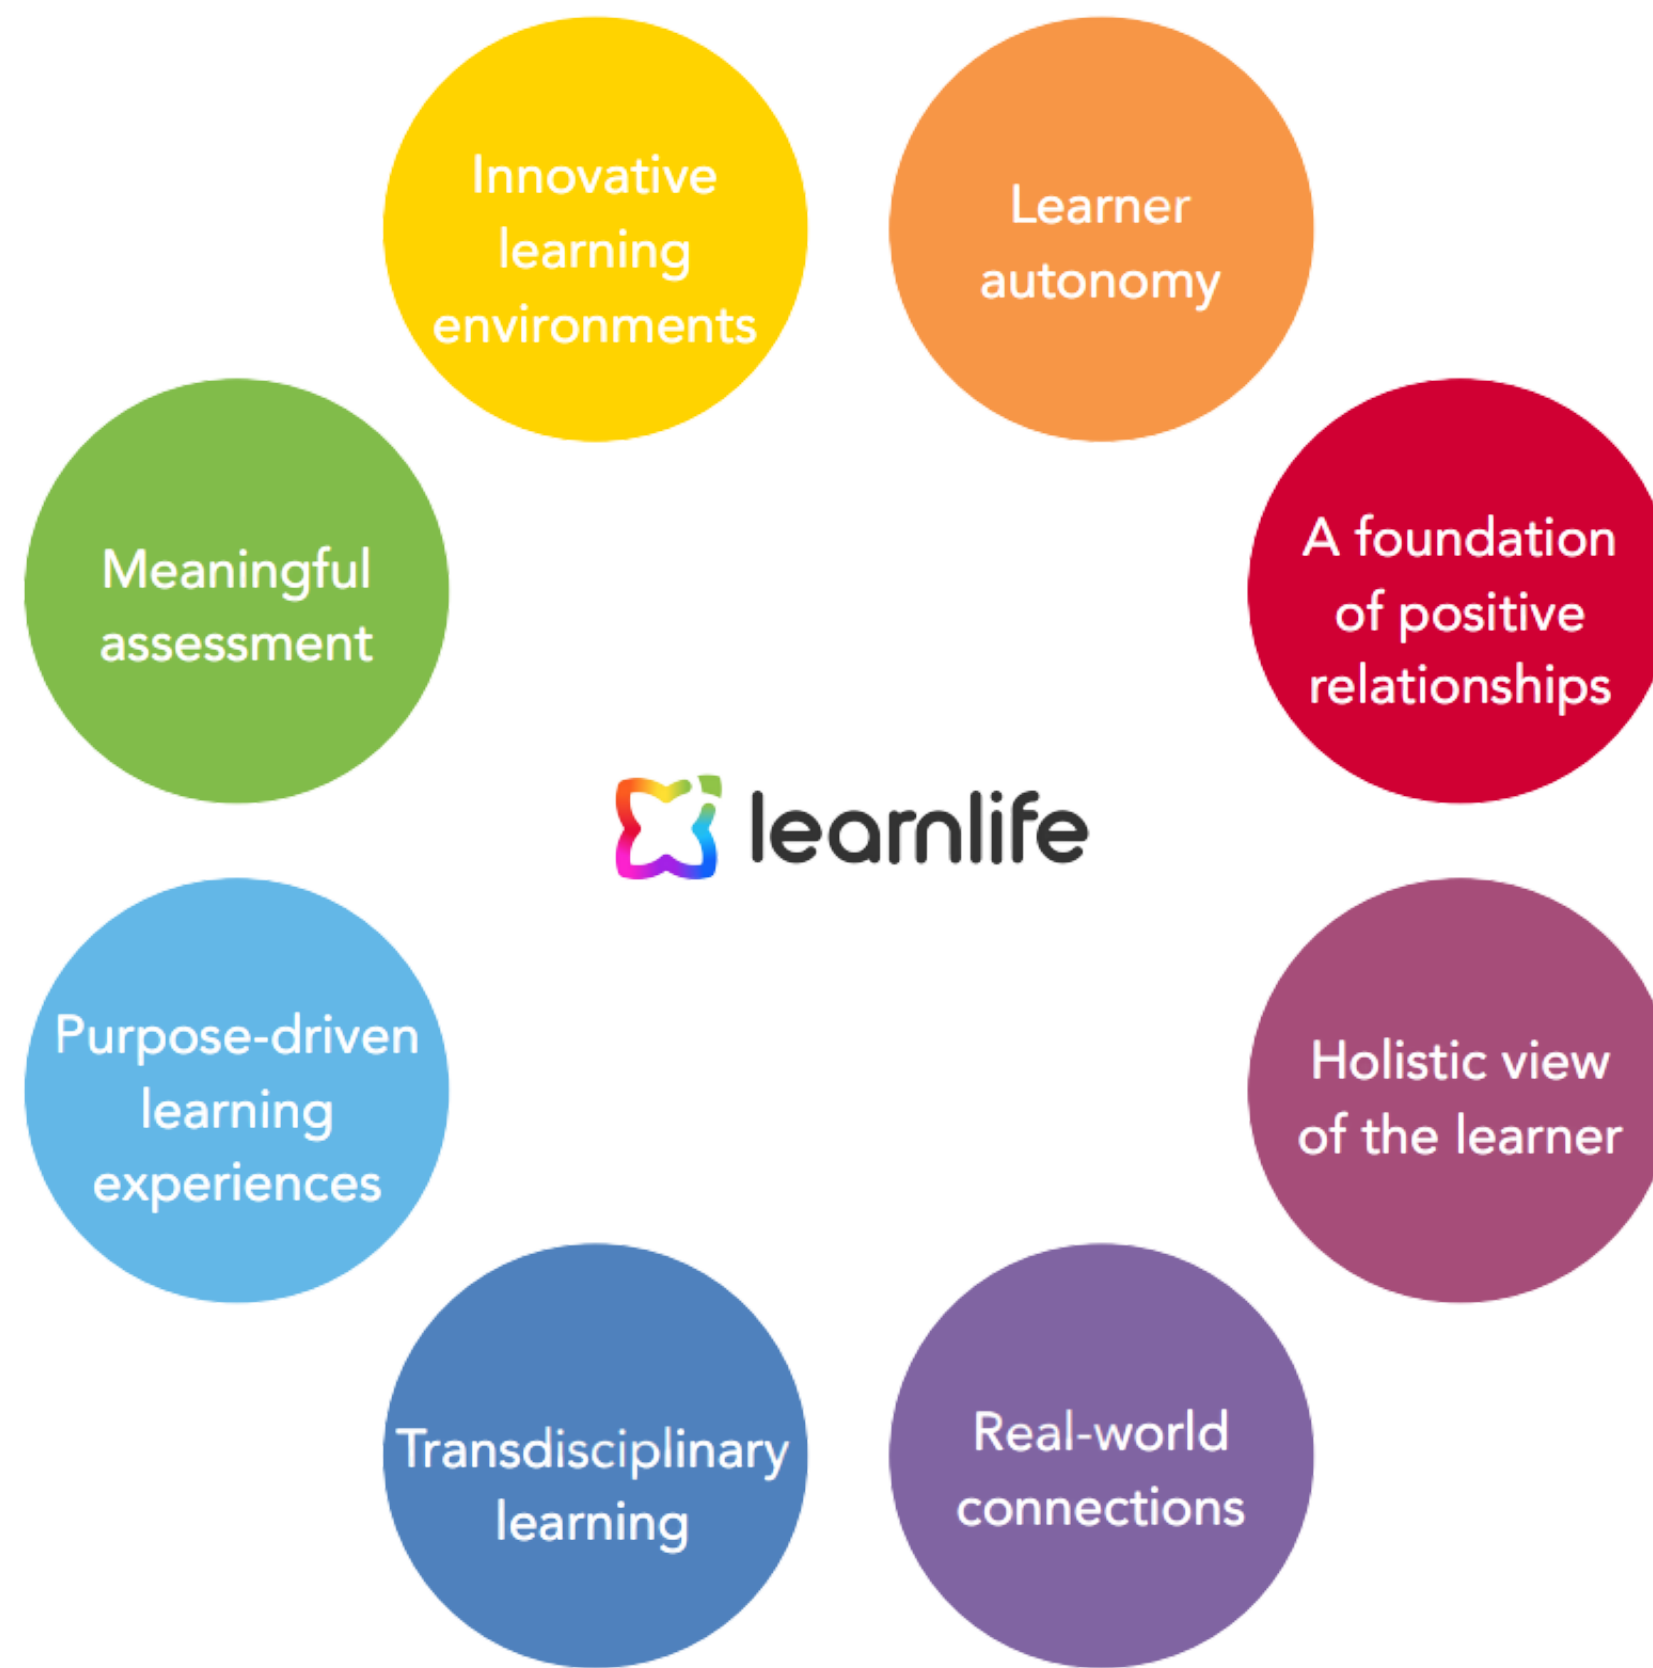

Our purpose is to empower all people to become happy, self-directed, lifelong learners and discover their calling in life.

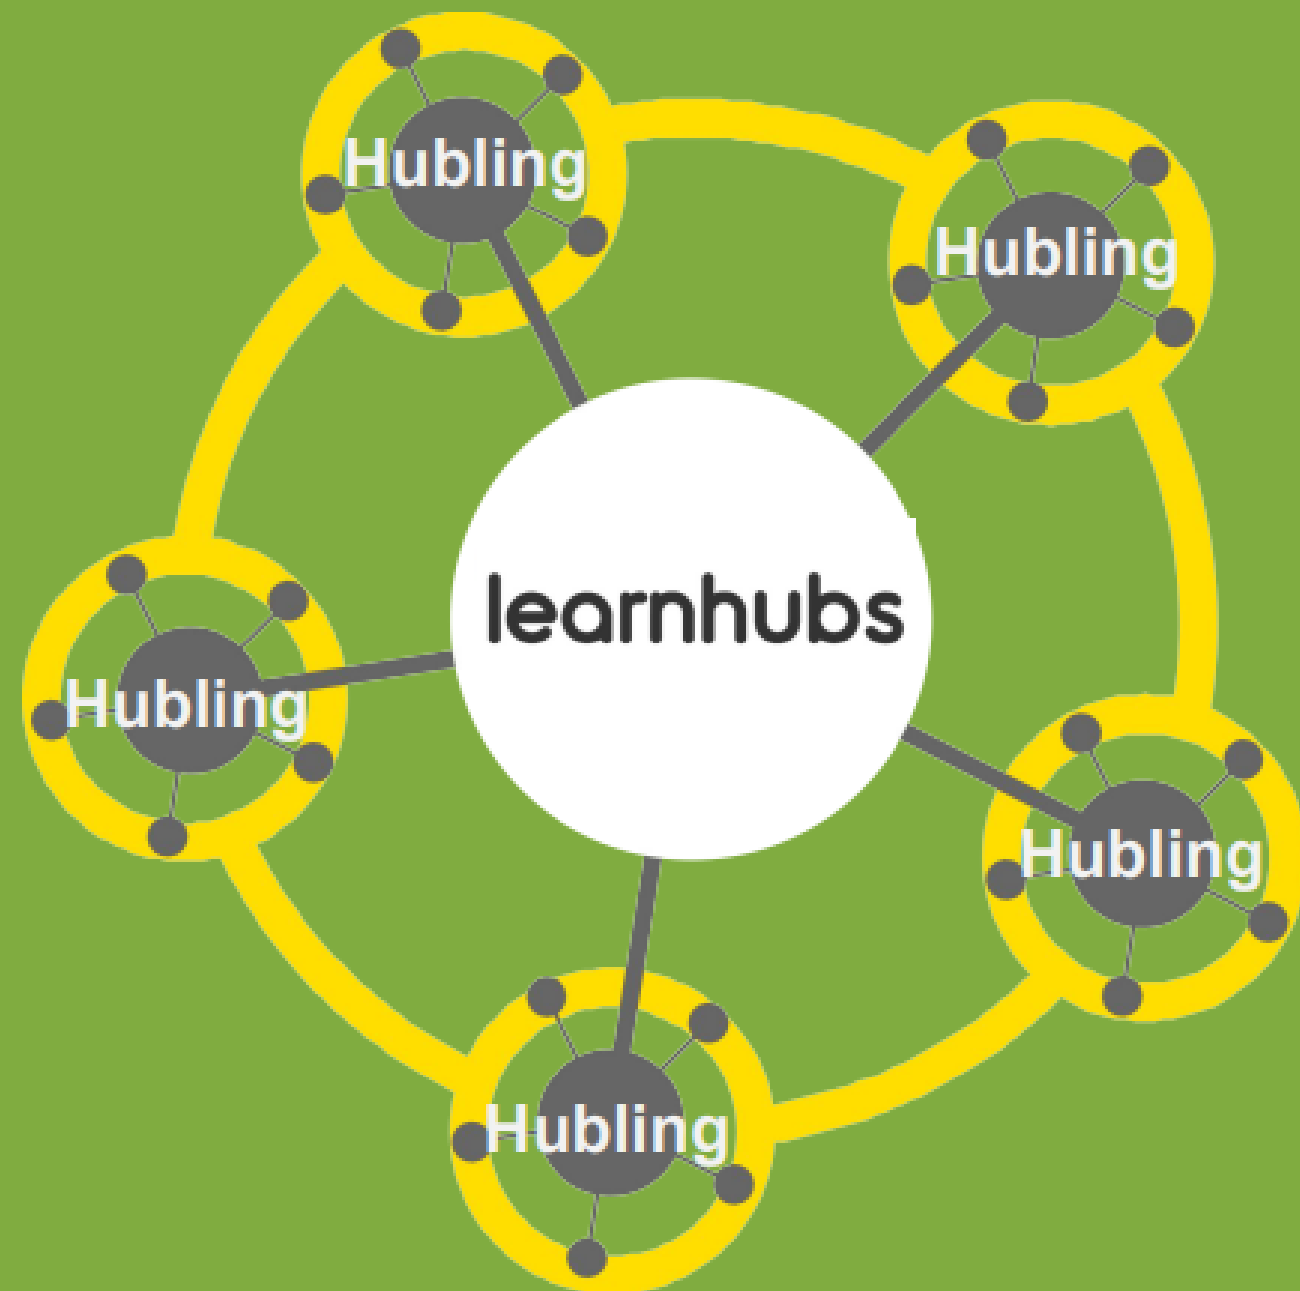

Vision

We envision a world where every human is part of a lifelong learning ecosystem that empowers them to co-create a positive future.

Mission

Our mission is to build an open ecosystem for a new lifelong learning paradigm to positively change education worldwide.

What are Learnhubs and Hublings?

Learnhubs are the physical spaces that make the new learning paradigm experienceable.

They empower learners, teachers, parents, school leaders, and government officials to rethink education.

A Hubling is typically a standard classroom of around 60 m² (645 sqft) converted into a digitally enabled creative multi-purpose studio.

Hublings allow schools to integrate technology and creativity into and alongside the existing curriculum in a meaningful way.

Nature Hub in Barcelona, Spain

Architect Sol Espoille is a fan ... "It is such a Joy watching kids have fun with Xbricks"
