

muzo Indoor/Outdoor

Designed by Jennifer Newman

An Indoor/Outdoor range of products for the 21st Century

Expertly crafted, contemporary furniture that withstands life in dynamic indoor and outdoor environments including learning spaces, cafes, terraces, break-out and buzzing creative studios.

Quality materials, vibrant color and beautifully engineered details are at the heart of this range.

Get to know the designer, Jennifer Newman.

Where do you find your design inspiration?

The answer is very short, it comes from a drawn line. I trained as an artist and I draw all the time, I'm visualising all the time.

Do you have a favourite piece of furniture or a furniture designer that you admire?

I like Ron Arad. I don't really see very much else and I deliberately don't look at other furniture if I can avoid it. I found as a painter that looking at art elsewhere would influence my art.

Can you tell us about your new design, the 'Alfresco Mini' table, which you are launching tonight at the Bureau Night Garden, outdoor furniture event?

It's a smaller version of an existing Alfresco which is a pretty big, meaty table. I played with the design because it is pretty robust, and I didn't want to lose that, so I tore everything up. I started with it as a triangular structure and it just worked. We made this one first and invited architects to see if there was anything that they would change. Everybody liked it straight away. We have a version for outside, painted in all sorts of colours. The research we've put it in to developing that has been full on, working with scientists to find the right solution. We can match the floor, the curtains on the inside and put it outside in identical colours.

What are the key considerations for businesses/designers when they are commissioning outdoor furniture?

It's marvellous if they can come in with a sense of scale, bring drawings with them, bring swatches, let me know what the floor is, what the colours on the wall are, give me all the information. It's just about talking, and quite often we will develop something that actually neither myself nor the designer thought about in the beginning. It can all change. What the designer sees in my showroom isn't necessarily what they'll end up with, it's a bit of mix and match.

Can you describe your brand in 3 words?

bold, simple, timeless

A-frame demount

An update of our best-selling A-Frame bench, which now comes in a demountable format, making it suitable for awkward access points such as small elevators and narrow stairwells.

A sculptural take on the classic picnic bench silhouette, A-Frame Demountable has open ends with no cross-beam struts meaning that the table is suitable for wheelchair access and additional seating if needed. Constructed from all-welded recycled aluminium, the design's flush tabletop and seats are finished with rounded edges and corners giving a modern, clean shape and a striking end-on profile which will suit both indoor and outdoor spaces.

Manufactured using non-rust aluminum, the A-Frame Demountable is completely weather hardy.

Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

A-Frame Demountable is easily assembled using feature stainless steel bolts which can be removed or added in a matter of minutes.

Alfresco Mini

Fans of our Alfresco bench are going to love its mini-me. Alfresco-Mini was born from a need for something compact, yet with all of the uncompromising quality of the original Alfresco design. It is super solid with an Iroko Hardwood or powder-coated aluminum surface and a brushed stainless steel frame. This makes it perfect for combating even the most extreme weather.

With a palette of colors to choose from, this is a clever little number that can be adapted for any scheme. Alfresco-Mini will withstand the environmental challenges of outside spaces.

Block

Our Block collection is designed to make a serious impact with a selection of striking color finish options. The frame is made from non-rust powder-coated aluminum for unrivalled durability, Block can be left outside all year round with minimal maintenance needed - which has made it a favorite for outside and inside spaces in some fantastic locations.

Surface options for outdoor use include powder coated aluminum or Natural Iroko Hardwood. For indoor use choose from a beautiful range of stained birch ply tops.

Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

Block has two bench types to choose from - in the matching style of Block table or can be the solid-end Block End Bench.

Block will withstand the environmental challenges of outside terraces.

Edge

Edge was conceived as a bold sculptural piece for both inside and outside spaces. Found in some of the best locations the chunky, yet subtle, aluminium base and powder-coated aluminum or Iroko Hardwood table top, make this table ready for all weather conditions with no maintenance needed. With the choice of a Muzo specially selected colour, Edge can coordinate with all schemes of any style. The Edge benches can mix and match with other products such as Ping Pong (see cover shot).

Linear

Linear is our brand new outdoor/indoor design and like all of our Jennifer Newman pieces - can be left outside all year round. Two bench options are available - one with a back for support. The solid table-top surface has been specifically designed to prevent wind from creating any uplift, making Linear an ideal option for use on exposed terraces and balconies. A bolt-down option is available for security purposes.

Linear comes in a powder-coat finish which, as well as being anti-bacterial, is extremely hard-wearing meaning that tough outdoor stains and any standing water can be easily cleaned and removed. Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

Linear has been specially designed to withstand the environmental challenges of outside terraces.

Trestle

Our new all-metal ultra strong and durable Trestle table and matching benches, for inside as well as out, will allow the aesthetic to flow from inside to out for design continuity. Communal sized, the large version seats 8 comfortably so is an excellent option for outdoor meetings where social distancing is required. The solid table-top surface has been specifically designed to prevent wind from creating any uplift and the flat undersides of the tables and bench tops ensure that there is no tendency for uplift to occur, making Trestle an ideal option for use on exposed terraces and balconies.

For security purposes a bolt-down option is available. Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

Trestle is demountable and easily assembled using feature stainless steel bolts which can be removed/added in a matter of minutes.

Trestle will withstand the environmental challenges of outside terraces.

Ping-Pong

All work and no play? Not the case with our Ping-Pong meeting table. Hard wearing and rust-resistant, the heavyduty aluminum design is ideal for both meeting rooms and outdoor communal areas. Its sturdy all-welded aluminum frame can withstand wind, rain and the most passionate of games.

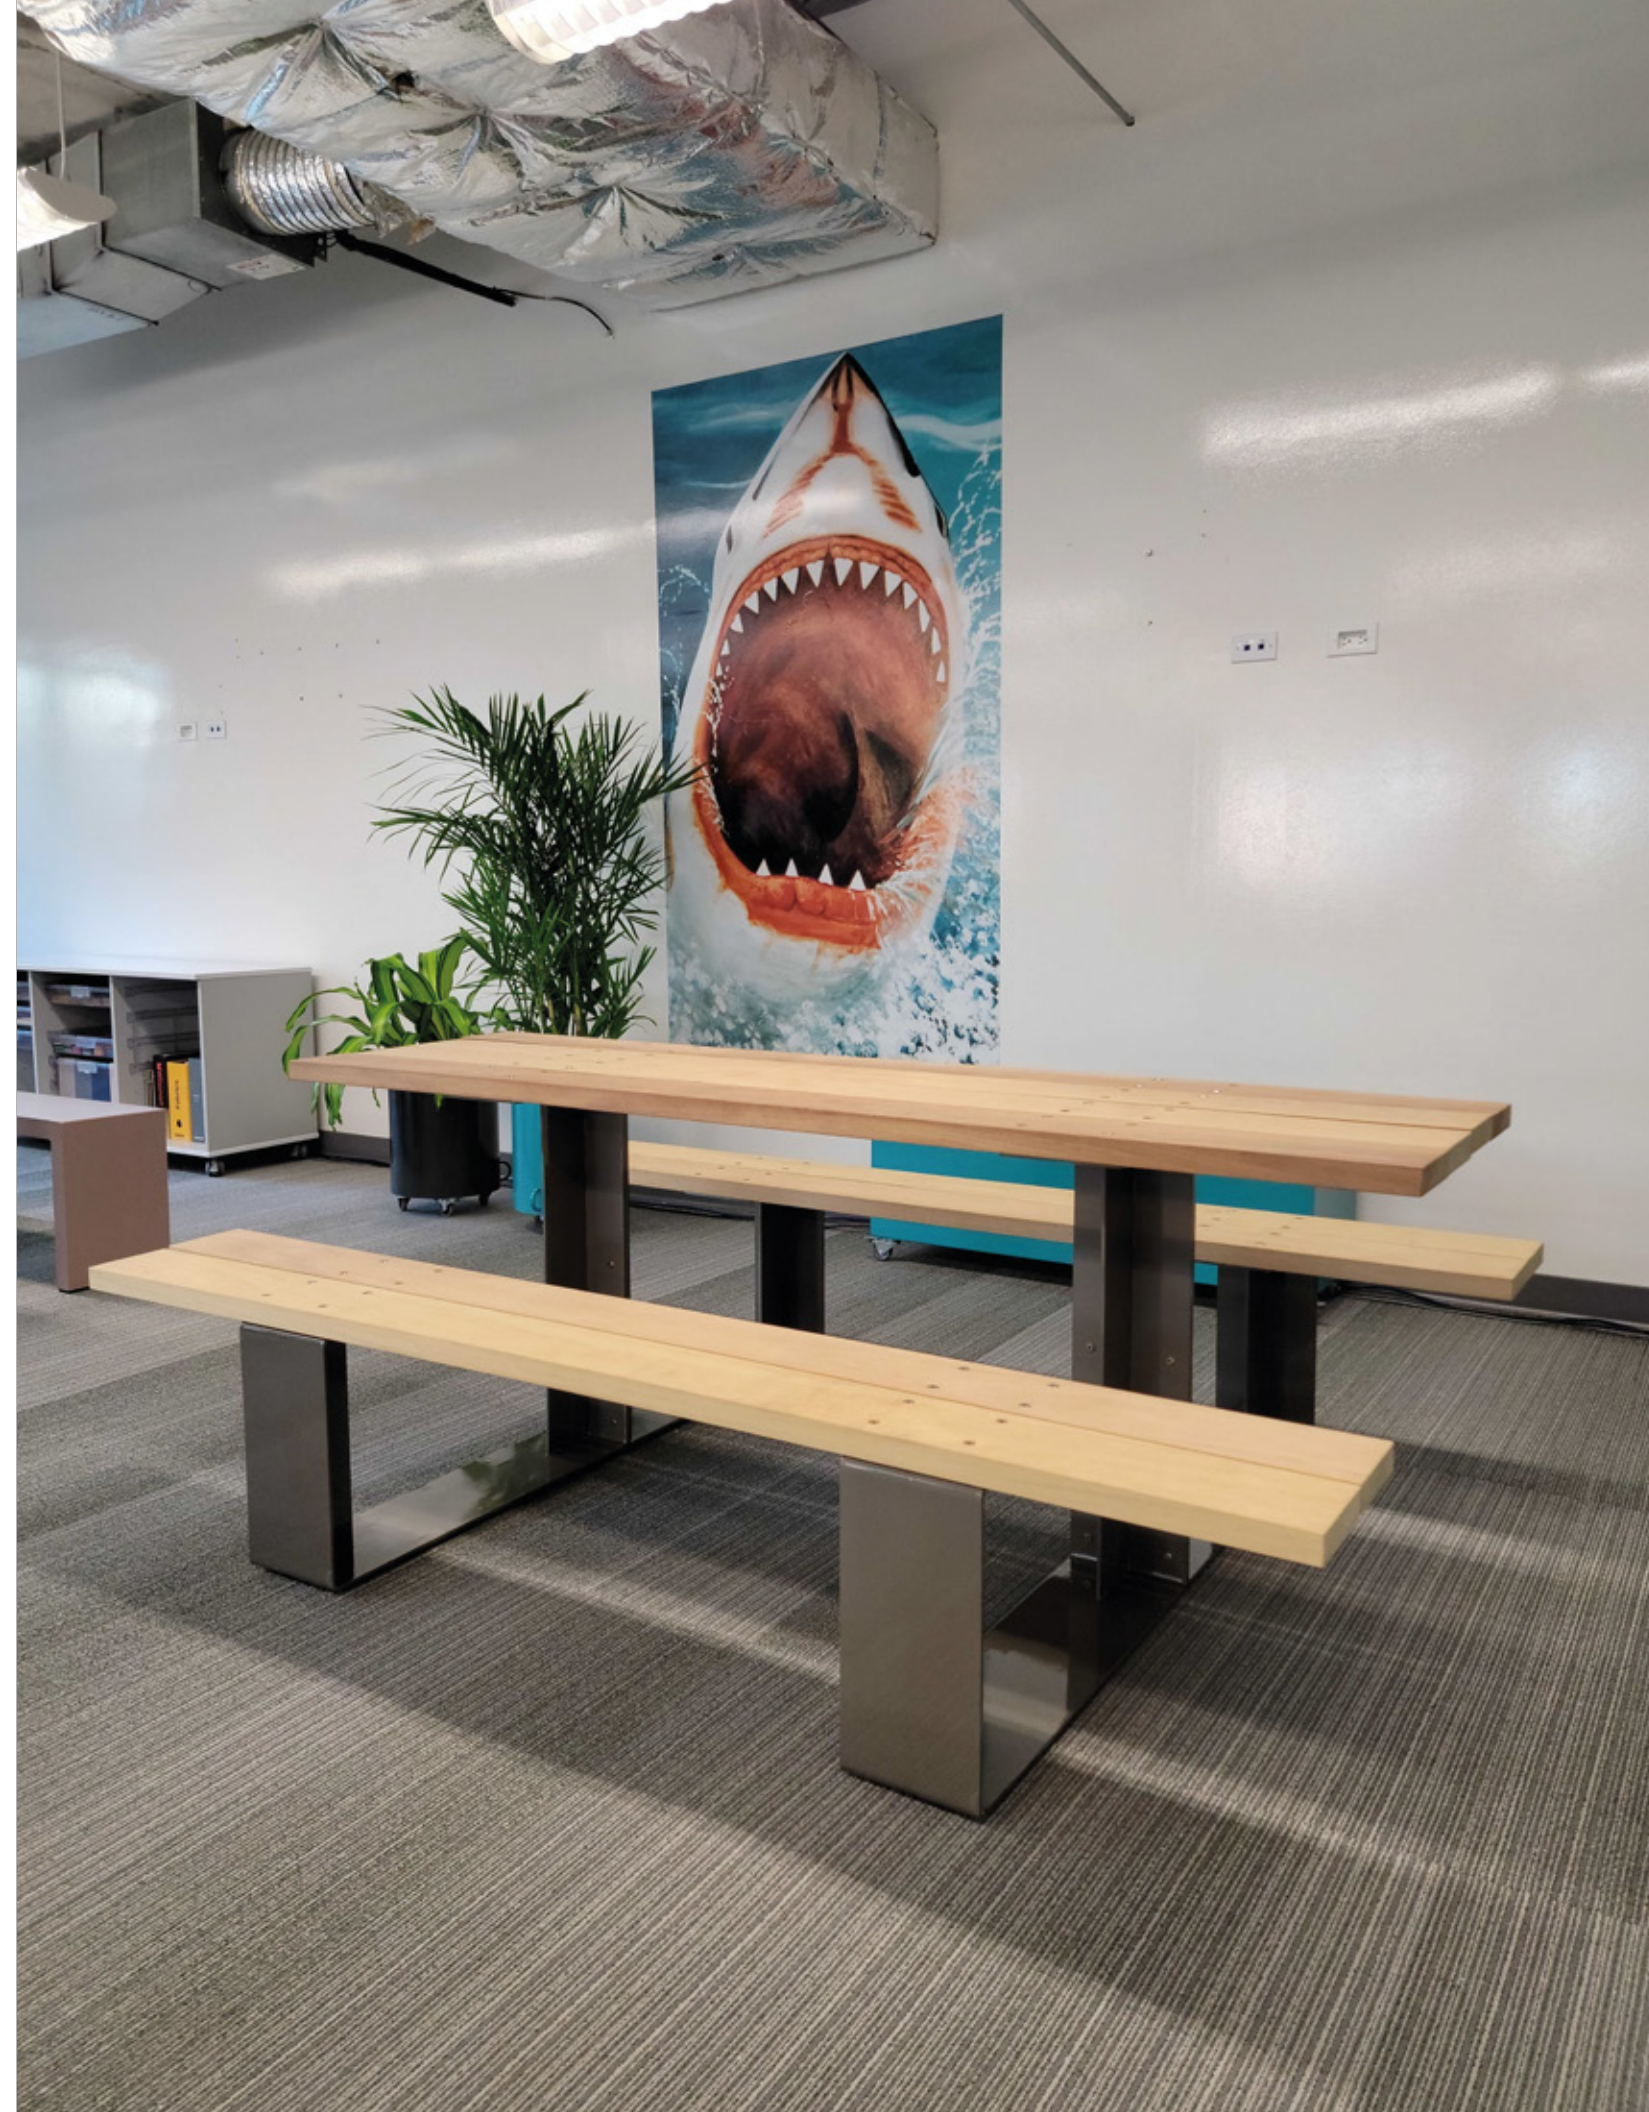

The bolt-on net can be removed easily when it's time to get back to business, turning Ping-Pong into a large scale meeting table that seats 10 comfortably. Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

Alfresco

Ultra strong and durable, Alfresco Bench is a must for exposed terraces that face extreme weather conditions. With a powder-coated long life aluminium surface and contrasting brushed stainless steel frame, our sculptural Alfresco Bench is an all-rounder statement piece that seats 8 or 10 comfortably - with cantilevered ends for wheelchair access.

Alfresco Bench will withstand the environmental challenges of outside terraces.

Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

Box planter

Box is a great planter option for terraces, balconies and indoor spaces. The lockable castors mean that the planter can be wheeled into sunlight for plant health, or outside for replanting without any heavy lifting.

Using only premium aluminum for our planter designs, they are lightweight and will not rust.

Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

Drum planter

Drum is our striking sculptural planter collection that allows for easy maneuverability thanks to its four in-built lockable casters. This means the planter can be wheeled into sunlight or outside for replanting without any heavy lifting. The small handle on the side of each planter adds a modern design detail but also acts as a security ring so that the planter can be connected to an external wall in public areas.

We only use premium, hand-welded aluminum for our planter designs which, as well as being lightweight, will not rust and will last for years without any maintenance required.

Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

A-frame bench

The classic picnic bench silhouette re-imagined in all-welded one piece aluminum with rounded edges and corners giving a modern, clean shape. Its simple silhouette is as popular for inside use as it is for outside areas.

A-Frame Bench is extremely strong and weather hardy and the self-leveling legs make the design sturdy for uneven surfaces. Bolt-down brackets, which are available for security purposes, could be used for highly exposed wind areas (see A-Frame Demountable).

Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

Tall Trestle

The tall sibling of the beautiful Trestle table. The solid table-top surface has been specifically designed to prevent wind from creating any uplift and the flat undersides of the tables and bench tops ensure that there is no tendency for uplift to occur, making Trestle an ideal option for use on exposed terraces and balconies.

Combine two Tall Trestle benches to create a standard height table space. Move the benches away to create a comfortable standing platform to meet, dine and collaborate.

Choose from our specially selected color range or co-ordinate with outdoor or indoor schemes in a bespoke RAL color of your choice.

In-house production

At Muzo, our passion is creating quality, unique, handcrafted outdoor furniture that is second to none. We are proud that all our indoor/outdoor products are exclusively engineered and manufactured with care, love and detail at our Pennsylvania metal factory. Furthermore, we source all materials from within a 2 hour radius of our facility. Lead times are therefore competitive and reliable, and we minimise our carbon footprint.

Power in Powder

The Muzo factory in Pennsylvania also features our own in house powder coating facility. We proudly partnered with Sherwin-Williams to provide a magnificent world of color and quality.

Powdura® ECO powder coatings from Sherwin-Williams are a next-level approach to sustainability. This transformative product collection elevates powder coating sustainability to new heights – providing customers a more eco-conscious solution to product protection, color and performance.

The innovation behind these polyester TGIC and TGIC-free Powdura ECO powder coatings is extraordinary. Plastic waste converts into a durable, high-performing polyester resin that contains 25% post-consumer recycled plastic (rPET). Each pound of Powdura ECO coatings contains the equivalent of 16 sixteen-ounce recycled plastic bottles and delivers the same performance as conventional polyester powder coatings.

Suitable for use in interior and exterior environments, Powdura ECO coatings meet or exceed your existing powder coating performance standards, and provide increased flexibility and impact resistance. They deliver an exceptional balance of mechanical properties, excellent color retention and solvent resistance. These polyester-based coatings are customizable to meet your requirements and can align with third-party certifications like LEED, GREENGUARD® and BIFMA Level®.
