

A photograph of a cave entrance leading to a sunset over a coastal landscape. The cave's interior is dark and textured, with the entrance arch framing a bright orange and yellow sunset sky. The ground inside the cave is covered in small, reflective pebbles. Outside the cave, a sandy beach leads to a calm sea under a hazy sky. In the distance, a construction crane is visible on the horizon.

AGILE PODS

Poor school acoustics can make a teacher's job difficult. A noisy, excitable class with uncomfortably high reverberation levels can lead to raised stress, resulting in unproductive lesson time for teachers and students.

The first of its kind.

AgilePOD offers a calm zone within any space. This unique sanctuary is a fun and stylish cocoon-like design with rechargeable battery driven power making it easy to relocate and re-purpose throughout the building. The fully inclusive acoustic Pod provides a quiet haven for students to work alone or in focused collaboration without being closed off by claustrophobic doors.

AgilePOD adds a new dimension to your space with Class A rated acoustic performance: Noise-absorbing properties reduce distraction and reverberation inside and outside the Pod thanks to its innovative, sound softening materials, modular design and shape.

Audio Quality

AgilePOD is the perfect audio space to record a high quality podcast or listen back to a recording.

ADA

AgilePOD is perfect for easy wheelchair entry and exit. Our goal is to create environments where all children can flourish. ADA/wheelchair-compliant AgilePOD can be used by everyone.

Neurodiversity In The Classroom

Students with autism who are included in regular classrooms develop more positive views of themselves, form friendships with neurotypical kids, and are better able to keep up with the curriculum and learn important academic skills.

AgilePOD provides neurodivergent students with a space that helps improve their concentration, The pods act as a quiet space in the classroom if they need to de-stress. Teachers can use the pod to help a student avoid a build-up of stress or help them to recover quickly if stress does occur, without drawing attention to the rest of the class.

Locate Anywhere

AgilePOD+ can be located anywhere in a room. The unique untethered AgilePOD+ features a quick release battery that clips into the pod wall and powers the lighting and the user's laptop or tablet. This means you are no longer limited by the onboard battery capacity of your laptop or tablet. The TSA limits laptops to 100 watt-hours. Most laptops include 50 watt-hours. Agile Pod + has an agile power system built in that adds an extra 200 watt-hours.

Advantages

- No wires means no trip hazards
- Shared resource
- Powers any device

If a wired power and lighting option is preferred that is also available.

Pop-up

AgilePOD is agile, simply a breeze to assemble, disassemble and easily relocated.

Be Seen

The AgilePOD design ensures occupants can be seen and no doors means no escape hazards.

Products

What do we need in our Pod today?

A bean bag, a table, a campfire setting? Our furniture works seamlessly with AgilePOD. We design blended classrooms, libraries or open communal spaces to be flexible and valuable to your community.

Our furniture designs have a significant social and economic purpose. Our product development teams aim to positively impact education, community, and the natural environment while promoting joy, curiosity, imagination, wellness and agility.

Take a look at some of our suggested products that work with AgilePOD allowing you to get the most out of it.
