

JuiceBot Jr

Multilingual Audio Assistant

muzzo

**Every classroom deserves a voice
every child can understand.**

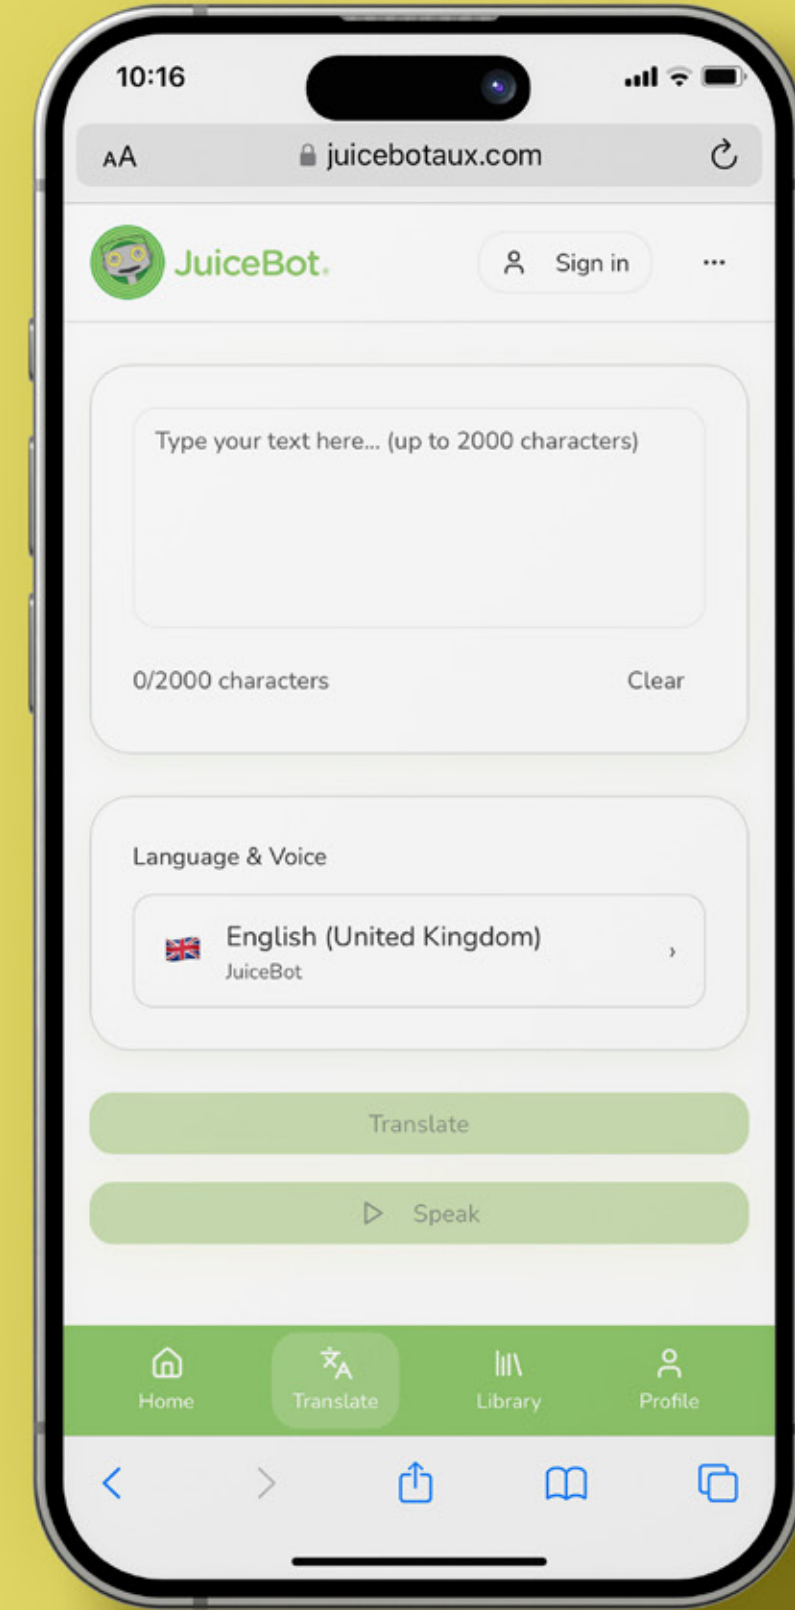

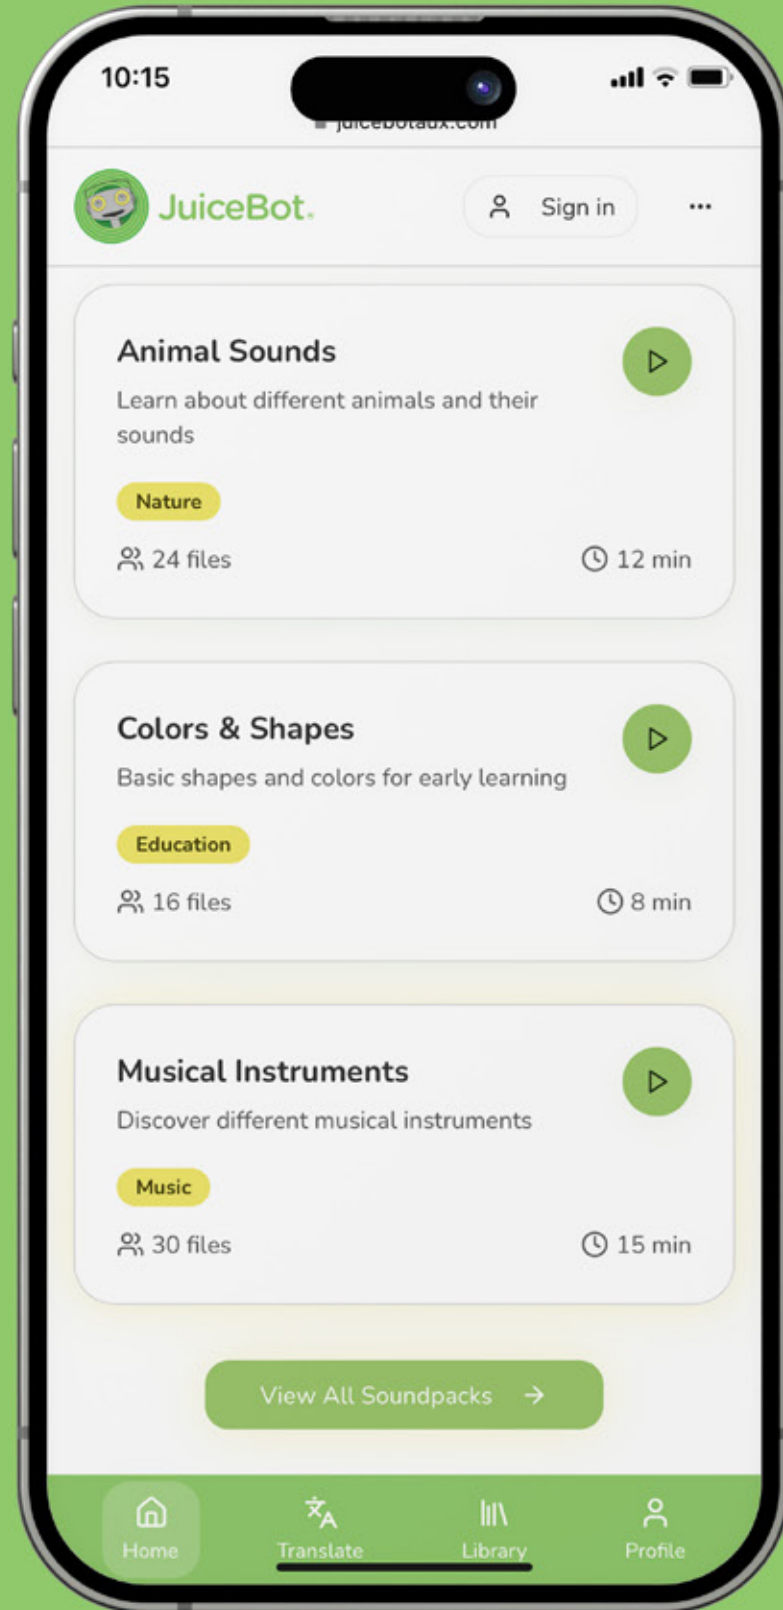

JuiceBot Jr is the multilingual audio assistant that helps teachers, librarians and educators engage every learner through sound, storytelling and instant translation.

**Children naturally build emotional
connections with characters.**

As a trusted classroom companion, JuiceBot encourages participation, listening and language development.

***“They help us do engaging, accessible,
interactive story time! The parents and
teachers love them as much as the kids do!”***

JuiceBotAux.com

Give JuiceBot Jr a voice with a global translation and audio platform for creating, organizing and sharing sounds and phrases.

Break Language Barriers Instantly

Engage JuiceBot Jr as your real-time bilingual interpreter, speaking naturally in hundreds of international voices.

A Polyglot in Your Pocket

Generate, script, and save custom phrases flawlessly across 80+ languages.

Your Audio Playground

Instantly access a massive, curated library of studio-quality music, immersive soundscapes, attention-grabbers, timers, and icebreakers.

Mix Mastery, Made Simple

Build curated, custom soundpacks for each session or class: upload your own clips, mix in library favorites, and layer in multilingual phrases.

Total Audio Control

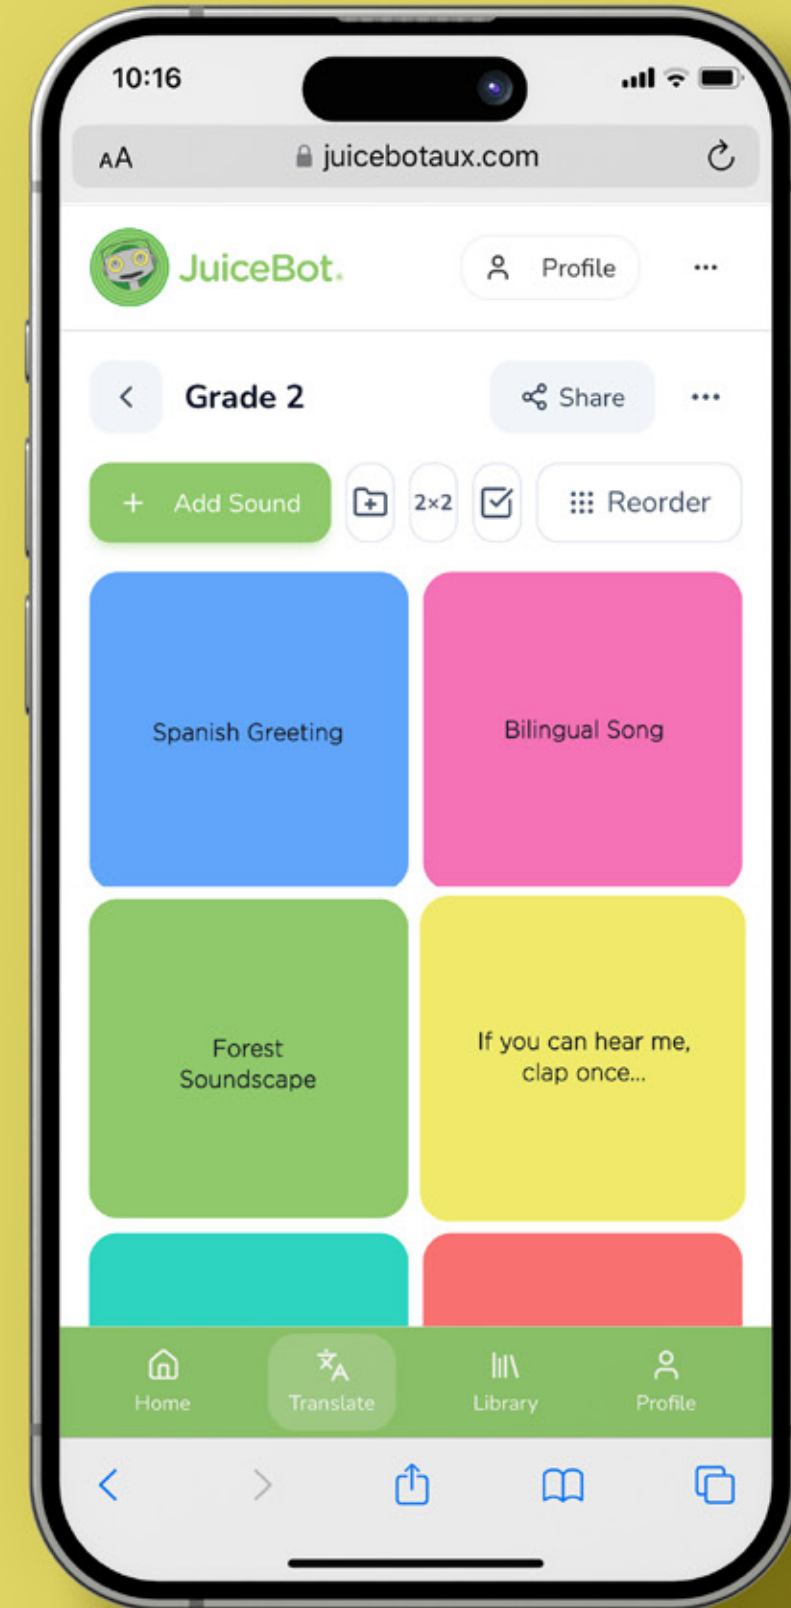

Organize by color, rename on the fly, and perfect your mix with precise volume, looping, and fade controls.

Share with a Tap

Drop a simple link to instantly share your custom soundpacks with colleagues or the global JuiceBot community.

Unlimited Fresh Audio

Never run out of inspiration...browse and download community-created soundpacks straight to your account.

"If you talk to someone in a language they understand, that goes to their head."

"If you talk to them in their own language, that goes to their heart."

JuiceBot Jr adds a fun welcoming presence to every counter, classroom or communal area.

Create the vibe you need at the touch of a button with music and soundscapes from around the world.

JuiceBot Jr Transforms Learning

Nurturing Imagination

Transform any place into a world of imagination with JuiceBot Jr's soundscapes, sound effects, music, and multilingual characters that make learning a sensory experience. As a classroom character, JuiceBot Jr provides an engaging alternative to screentime that invites children to listen, imagine what they're hearing and create what they're imagining.

Simplifying Translation

Modern classrooms are multilingual, and teachers require a tool to help them understand and be understood. Learning languages unlocks opportunities for study, travel, relationships and career opportunities, and JuiceBot can incorporate languages into learning a simple, fun way.

Connecting people across languages

JuiceBot's One-Way Translation Platform

JuiceBot Jr can say whatever you type, in the language of your choice. Create phrases on the fly or prepare them in advance and save to a sharable soundpack folder, so that you can tell stories in Spanish, make announcements in Arabic, read poems in Polish or give instructions in Urdu.

JuiceBot's Two-Way Translation Platform

Simply select two languages and JuiceBot will translate between them enabling two people to communicate, whatever languages they're speaking. When you need to cross language barriers with students, parents or colleagues, JuiceBot Jr provides an easy-to-use solution, and as a fun character can facilitate learning and practising language speaking skills.

Sensory Regulation

Classrooms are neurodiverse and young learners need to be emotionally regulated before they can be educated. Sensory Circuits provide a combination of activities to Alert, Organize and Calm students' bodies and minds so that they're regulated and prepared for learning.

JuiceBot helps facilitate these activities with Sensory Circuits that include music, instructions and mindfulness. Audio literally changes the vibe in a room and JuiceBot's soundscapes of nature and variety of music, all played through a powerful 50W speaker, can transform how a room feels.

Lesson Organization

Teachers like to enhance lessons with audio and often end up using multiple browser tabs. With JuiceBot's Audio Library, teachers have all the audio they need in one place, organized, color coded and shareable.

Create a Custom Soundpack using sounds from JuiceBot's Audio Library, uploaded sounds from your own device, and multilingual phrases generated with JuiceBot's One-Way Text-to-Speech translation platform. Share your soundpack with colleagues who can subscribe and follow any changes you make or duplicate these sounds into their own library to make changes of their own.

Catching Attention

Attention spans have diminished over the past 3 decades, but without paying attention, a child cannot learn. Kids connect with characters, and audio attracts our attention. JuiceBot's folder of Attention Grabbers provides all sorts of fun, active and musical ways to ensure that teachers have students' attention.
