Creative pioneers daring to challenge the status quo with forward-thinking design for the 21st century.

Flexible products designed to give learners greater choice, movement and control over how they use their space.

JuiceBot®

Designed to bring learning to life, JuiceBot combines engaging audio and multilingual communication in one playful character. From powering devices to telling stories, encouraging movement and breaking down language barriers, JuiceBot brings a little extra energy to every learning space.

Sound that inspires	From storytelling and educational games to music, movement and calming soundscapes, JuiceBot turns everyday activities into engaging sensory experiences.
A voice for everyone	Multilingual text-to-speech helps educators communicate across languages, making learning more accessible and inclusive.
Less screen time. More imagination.	Through storytelling, soundscapes and interactive audio, JuiceBot encourages children to listen, imagine and engage without relying on screens.
Two sizes. One big personality.	From the powerful, device-charging JuiceBot Senior to the compact JuiceBot Jr, there's a playful learning companion for every space.

JuiceBot®Jr

Your portable audio companion.

Scan to visit product page

Small but mighty.
Compact, portable and full of personality. Bring engaging audio to any classroom, library or learning space.

Overcoming language barriers.
One-way and two-way translation helps students, teachers and families communicate across languages.

Listen. Imagine. Create.
Bring stories to life with immersive soundscapes, music and interactive audio that inspire screen-free learning.

JuiceBot®Senior

The mobile power and audio station.

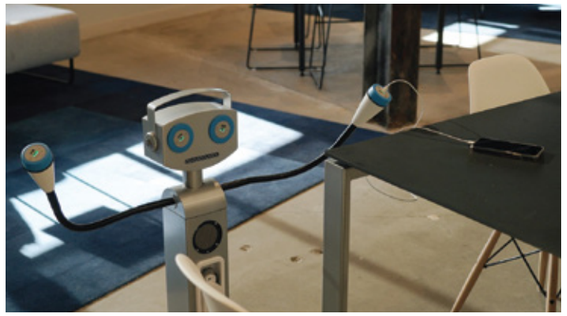

Scan to visit product page

Power without boundaries.
Rechargeable battery power and 10 USB ports keep devices charged without being tied to a wall socket.

Turn up the engagement.
A powerful Bluetooth speaker brings stories, music and movement to life, creating exciting sensory experiences.

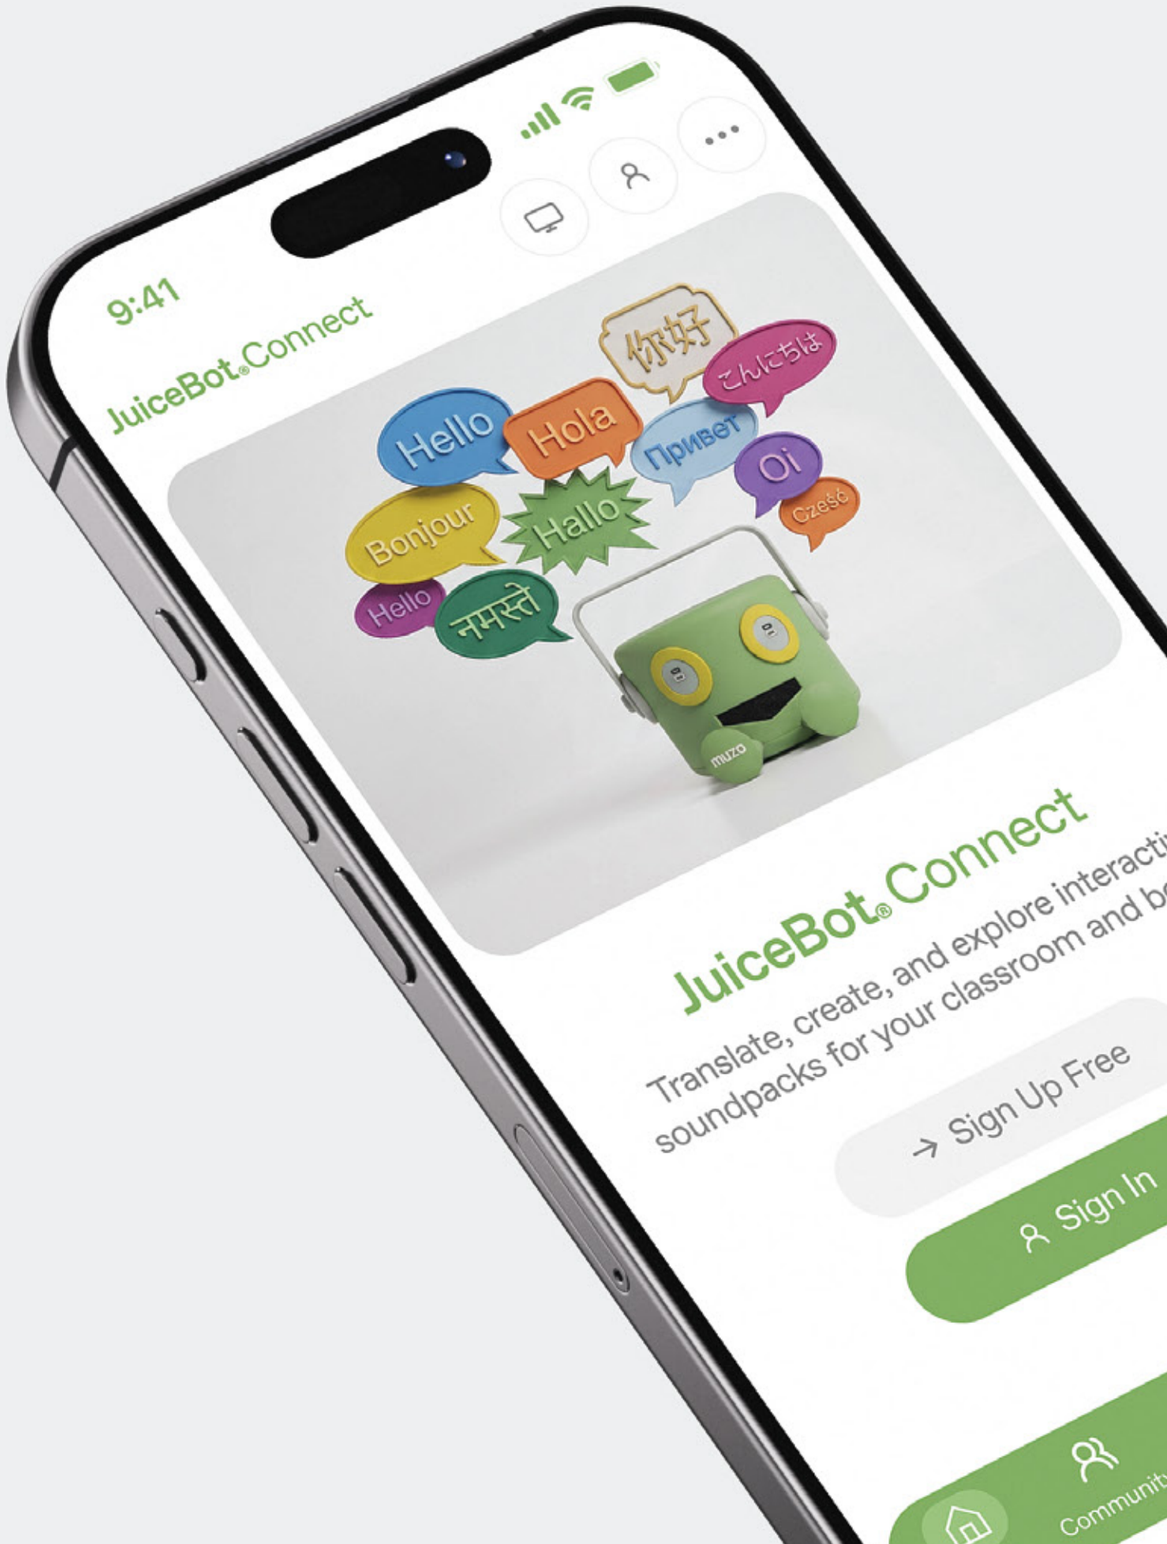

Flexibility built in.
Move power and audio wherever they're needed, with a mobile design and adjustable arms for easy access.

JuiceBot® Connect

The web-based app brings JuiceBot Jr and Senior to life with a library of sounds and a multilingual text-to-speech platform.

Translate	JuiceBot is your multilingual conversation interpreter, and can say whatever you type in hundreds of languages, dialects and voices.
Soundpacks	Layer sounds and create audio presentations, multilingual stories and inspiring soundscapes in Sound Studio.
Engage	Set the vibe in a room with calm or energizing music, let JuiceBot run activity timers, make announcements and add a dose of fun to every environment.
Organize	Create custom soundpacks to keep your audio files easily accessible. Collaborate with colleagues and share folders at the touch of a button.

A-Frame

A classic picnic table with a colorful Muzo twist. A-Frame brings people together with its bold, uncomplicated design and hard-working recycled aluminum construction. Made for indoor and outdoor spaces, it's rust-resistant, available in a wide range of colors and can even accommodate a parasol.

Scan to visit product page

Angle

A different angle on learning. Bright, bold and built for everyday adventure, Angle brings tables and benches together in a playful, practical design. Perfect for collaborative activities, social spaces and learning beyond the traditional classroom, it gives students somewhere to gather, share ideas and make the space their own.

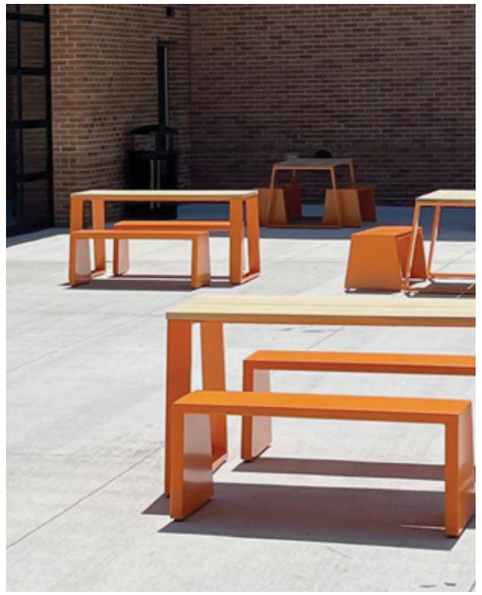

Scan to visit product page

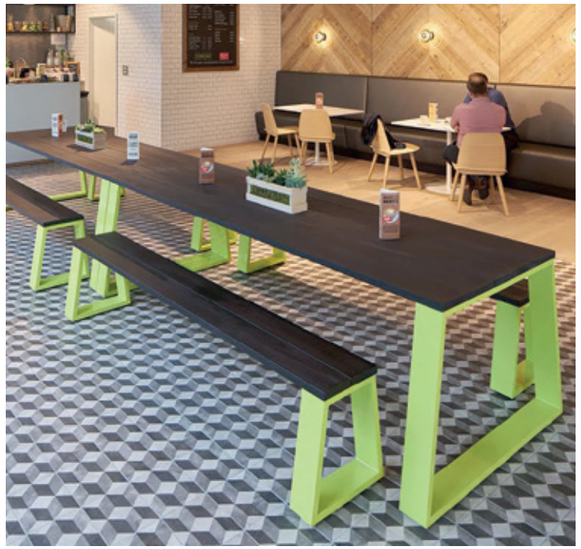

Block

Solid by nature, social by design. Block brings a confident, architectural feel to indoor and outdoor spaces, with robust tables and benches made for gathering. Its straightforward geometry, durable construction and vibrant color options make it a natural meeting point for everything from lunchtime conversations to outdoor learning.

product page

Edge

Sharp looks. Easy-going attitude. Edge combines strong architectural lines with practical table-and-bench seating that works just as well indoors as it does outside. Durable, uncomplicated and designed for shared experiences, it creates an inviting place to gather, collaborate or take five. Sometimes the simplest ideas make the biggest impact.

Flomo

Big ideas shouldn't be stuck to one wall. Flomo is a lightweight, magnetic writable board that goes wherever creativity takes you. Hang it, carry it, connect it or pair it with Xbrick to create an instant workspace. From spontaneous brainstorming to collaborative learning, Flomo turns almost anywhere into a place to think differently.

GoStorage

A great learning space isn't just about what you put in it. It's about how everything works together.

Storage is often overlooked, yet it can make or break the way a space functions. Cluttered classrooms, misplaced resources and overflowing cupboards all get in the way of learning.

At Muzo, we believe storage should be considered from the very beginning. Through our Storage Analysis approach, we look at the space, the people using it and the resources they need, creating a smarter, more organized environment that works day after day.

Analyze	Understand the space, its users and the resources that need a home.
Organize	Create a cohesive system that makes resources easy to find, access and manage.
Adapt	Build in the flexibility to respond as learning spaces and needs change.

Scan to visit product page

Learning spaces never stand still. So why should storage?

Modular by design
Mix and match frame sizes, tray depths, heights and configurations to create a system that fits your space.

Made to move
Fixed storage meets mobile flexibility, with durable casters that make transporting resources between spaces simple.

See it. Find it. Use it.
Crystal-clear trays and integrated label holders make identifying and accessing resources effortless.

Glide, tilt, access
Clever tray mechanisms provide easy access to contents, with built-in stops for added security.

Room to grow
Adjustable shelves and interchangeable trays allow users to reconfigure and adapt as resources, activities and learning needs evolve.

One system. Many possibilities.
From the resource center to the classroom and everywhere in between, Go Storage helps make every inch of a learning space count.

Gymba® Board

A little movement can make a big difference. Gymba brings gentle, active movement into standing work and learning, encouraging balance and natural shifts in posture throughout the day. Lightweight, portable and easy to introduce into everyday routines, it's a simple way to make staying active feel effortless.

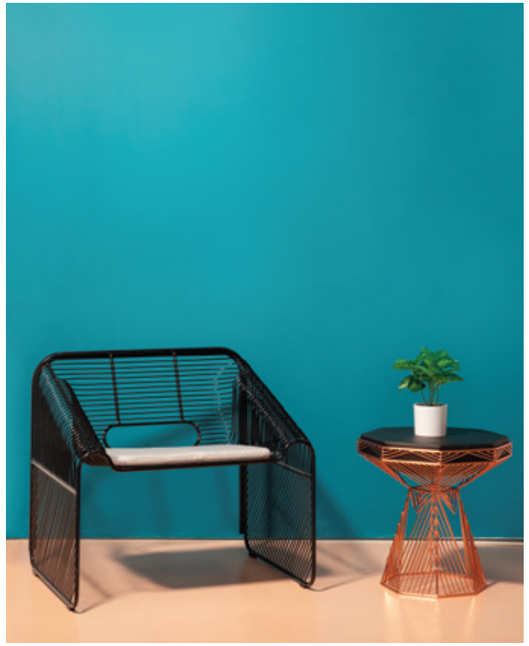

Scan to visit product page

Hot Seat

Take a seat with a little more character. Hot Seat pairs an open, airy wire-frame design with a relaxed, comfortable shape. Its distinctive silhouette makes a statement without dominating the room, bringing a fresh, contemporary feel to breakout areas, social spaces and anywhere people come together.

Scan to visit product page

Juice Tree®

Power to the people. Juice Tree brings convenient charging right into the heart of collaborative spaces, without the hassle of trailing cables. Its mobile design and multiple USB and USB-C connections keep devices powered and people connected, giving flexible environments the freedom to work wherever the action is.

K-seat

K-seat brings a fresh approach to everyday seating with its distinctive shape, lightweight feel and versatile design. From focused classroom activities to collaborative working, it offers practical support and stacks up to 21 units high without compromising on personality. Simple, colorful and ready for whatever the day brings.

product page

K-stool

A little extra height, a lot more flexibility. K-stool brings the distinctive character of the K-seat family to elevated workspaces, with a practical, lightweight design that makes moving between activities easy. Ideal for high tables, collaborative spaces and informal learning, it keeps things comfortable, colorful and refreshingly uncomplicated.

MBob floor

Who says learning needs to happen at a desk? MBob floor brings comfortable, supported seating down to ground level, opening up a more relaxed way to read, work and connect. Its low-profile design encourages freedom of posture and a fresh perspective, making it ideal for informal learning spaces.

Scan to visit product page

MBob

MBob has a playful, curved design that encourages movement and a more natural sitting experience. Lightweight and full of personality, it gives learners the freedom to find their own comfortable position, whether they're concentrating, creating or taking a moment to recharge.

Scan to visit product page

Mini Mobile

Mini Mobile brings a clever folding and nesting design to smaller-scale tables, making it easy to create, rearrange and reclaim space. With smooth mobility and a practical flip-top mechanism, it moves effortlessly between individual work, group activities and everything in between.

Scan to visit product page

Ping-Pong

Ping-Pong blurs the line between productive spaces and playful ones, bringing a little friendly competition into the everyday. With a practical table design that can switch between work and recreation, it encourages people to connect, recharge and discover that great ideas don't always happen sitting still.

Puzzle

Mix it up. Move it around. Make it yours. Puzzle is modular seating with a playful edge, designed to be rearranged into different layouts as needs change. From individual perches to collaborative groupings, its distinctive shapes and bold colors invite people to interact with their space in a whole new way.

Scan to visit product page

PXL

Make the walls part of the conversation. PXL brings color, creativity and changeable visual communication into everyday spaces through its magnetic display system. Refresh messages, share ideas or create bold visual statements without committing to a permanent design. A simple way to keep environments looking fresh, engaging and full of personality.

Space Chicken

A little table with a lot of attitude. Space Chicken brings a clever, compact work surface right where it's needed, making it easy to settle in with a laptop, notebook or coffee. Its distinctive shape and lightweight, portable design make it a natural companion for flexible working and informal learning.

Scan to visit product page

Space Chicken XL

Space Chicken XL takes the distinctive character of the original and adds a height-adjustable work surface, making it easy to find the right position for the task at hand. Ideal for flexible working and learning, it puts comfort and adaptability within easy reach.

Scan to visit product page

Switch

Switch is a mobile nesting chair designed for spaces that never stand still. Its clever construction allows chairs to move and store together with ease, making room changes refreshingly simple. Perfect for classrooms, meeting spaces and collaborative environments where flexibility is part of everyday life.

Scan to visit product page

Tall Kite®

Take collaboration to new heights. Tall Kite brings the clever folding, rolling and nesting capabilities of the original Kite system to elevated workspaces. Designed for standing meetings, high-level collaboration and flexible layouts, it delivers all the practicality of a mobile folding table with a fresh perspective on how people work together.

Scan to visit product page

Trestle

Trestle brings a confident, architectural approach to communal tables and seating, with clean lines and durable metal construction. Designed for everyday use in indoor and outdoor environments, it offers a versatile place to gather, share and connect, without making things more complicated than they need to be.

Scan to visit
product page

Tall Trestle

Tall Trestle brings the same robust simplicity of the Trestle family to a higher, more informal setting. Its clean, architectural design makes it ideal for casual meetings, quick catch-ups and social spaces, creating an easy-going place to connect, collaborate or take a break.

—Educative Audio Design

The sound of learning

At Muzo, we believe sound has the power to shape how children learn, move, communicate and connect.

Our Educative Audio Design team brings together songwriters, composers, sound engineers, musicians and educators to create original music, songs and soundscapes designed specifically for learning environments.

Every sound is considered. From melody and rhythm to tone, tempo and repetition, we explore how audio can support attention, engagement, movement, transitions and the atmosphere of a space.

Not just sound. Sound with intention.

Every Muzo creation is human-made, thoughtfully crafted and designed with a clear purpose. We don't use AI to create our music or soundscapes. We put the learner at the heart of every sound.

Our question is always the same
What is this sound doing for the learner?

—Design Services

Our main design services include the following:

Product Design
Interior Design
Educative Audio Design
Educational Branding
Storage Analysis
